1. Record Nr. UNICASRML0268786

Autore	Gioberti, Vincenzo
Titolo	5: Lettere di illustri italiani a Vincenzo Gioberti / pubblicate con proemio e note a cura di Luigi Madaro
Pubbl/distr/stampa	Roma, : Vittoriano, 1937
Descrizione fisica	192 p. ; 26 cm
Lingua di pubblicazione	Non definito
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr. UNINA9910337669403321

Autore	Hahn Patrick D
Titolo	Madness and Genetic Determinism : Is Mental Illness in Our Genes? / / by Patrick D. Hahn
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2019
ISBN	9783030218669 303021866X
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (196 pages)
Disciplina	616.89042
Soggetti	Behavior genetics Psychobiology Psychiatry Medicine - History Behavioral Genetics Biological Psychology History of Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Nota di contenuto	1. The Beginning -- 2. Ernst Rüdin and Family Studies -- 3. Franz Kallmann and Twin Studies -- 4. The Story of the Genain Sisters -- 5. Adoption Studies -- 6. The Mass-Marketing of Mental Illness -- 7. The Human Genome Project Era -- 8. The Story of January Schofield -- 9. Trauma and Psychosis -- 10. The Asylum Era and Moral Therapy -- 11. Frieda Fromm-Reichmann and Chestnut Lodge -- 12. Ronald Laing and Kingsley Hall -- 13. Soteria House and Open Dialogue Therapy -- 14. The Ghosts of Rüdin and Kallmann.
Sommario/riassunto	This book explores the history of genetic determinist theories of mental illness, beginning in the nineteenth century and continuing right up to the present day. A century of research in the field of psychiatric genetics, from family studies to twin studies to adoption studies to genome-wide association studies, has produced no credible evidence of a strong genetic components to so-called “mental illnesses,” no findings that help the human condition in any way, and in fact has caused great harm by diverting attention away from the well-established causes of these conditions, which have their roots in trauma and other adverse childhood experiences. This book also explores the long tradition of humanistic psychiatry and its great success in treating these conditions with an empathetic, client centered approach—a tradition that has been all but forgotten in the modern era of biogenetic explanations and drug-centered treatments for mental illness. Patrick D Hahn is an Affiliate Professor of Biology at Loyola University Maryland, USA, and a freelance writer. .
