1. Record Nr. UNINA9910130717703321

Titolo	2012 IEEE/ION Position, Location and Navigation Symposium
Pubbl/distr/stampa	[Place of publication not identified], : IEEE, 2012
ISBN	9781467303873 1467303879
Descrizione fisica	1 online resource
Disciplina	623.8933
Soggetti	Electronics in navigation Navigation (Aeronautics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Intelligent polynomial curve fitting for time-domain triggered inertial devices -- Angular motion and attitude estimation using fixed and rotating accelerometers configuration -- Breakthrough in high performance inertial navigation grade Sigma-Delta MEMS accelerometer -- High performance gyro with fast startup time, high range, wide bandwidth, low noise and excellent vibration immunity -- Milli-HRG inertial navigation system -- Atom interferometric gravity sensor system -- A high sensitivity VDFLL utilizing precise satellite orbit/clock and ionospheric products -- Advanced signal processing scheme for GNSS receivers under ionospheric scintillation -- An integrated overlay architecture based multi-GNSS front-end -- Combined Doppler and time free positioning technique for low dynamics receivers -- E-textile microstrip patch antennas for GPS -- Generalization of the code tracking performance theory to receivers using non-standard local replicas.
