1. Record Nr. UNINA990001001020403321

Autore	Gradshteyn, Izrail Solomonovich
Titolo	Table of integrals, series, and products / I. S. Gradshteyn and I. M. Ryzhik ; incorporating the 4. ed. prepared by Yu V. Geronimus and M. Yu Tseytlin ; translated from the Russian by Scripta technica and edited by Alan Jeffrey
Pubbl/distr/stampa	San Diego [etc.] : Academic Press, c1980
ISBN	0-12-294760-6
Edizione	[Corrected and enlarged ed.]
Descrizione fisica	XLV, 1160 p. : ill. ; 23 cm
Altri autori (Persone)	Ryzhik, I.M.
Disciplina	517.00 510.2
Locazione	FI1 DINEL MA1
Collocazione	14-089.002 14-089.001 14-089.003 14-089.005 14-089.004 14-089.006 14-089.007 10 B II 138/1 3-A-4
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr. UNISA996466554403316

Autore	Phillips Jeff M.
Titolo	Mathematical foundations for data analysis / / Jeff M. Phillips
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-62341-6
Descrizione fisica	1 online resource (299 pages)
Collana	Springer Series in the Data Sciences
Disciplina	006.312
Soggetti	Data mining - Mathematics Machine learning - Mathematics Mineria de dades Aprenentatge automàtic Matemàtica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Acknowledgements -- Contents -- 1 Probability Review -- 1.1 Sample Spaces -- 1.2 Conditional Probability and Independence -- 1.3 Density Functions -- 1.4 Expected Value -- 1.5 Variance -- 1.6 Joint, Marginal, and Conditional Distributions -- 1.7 Bayes' Rule -- 1.7.1 Model Given Data -- 1.8 Bayesian Inference -- Exercises -- 2 Convergence and Sampling -- 2.1 Sampling and Estimation -- 2.2 Probably Approximately Correct (PAC) -- 2.3 Concentration of Measure -- 2.3.1 Markov Inequality -- 2.3.2 Chebyshev Inequality -- 2.3.3 Chernoff-Hoeffding Inequality -- 2.3.4 Union Bound and Examples -- 2.4 Importance Sampling -- 2.4.1 Sampling Without Replacement with Priority Sampling -- Exercises -- 3 Linear Algebra Review -- 3.1 Vectors and Matrices -- 3.2 Addition and Multiplication -- 3.3 Norms -- 3.4 Linear Independence -- 3.5 Rank -- 3.6 Square Matrices and Properties -- 3.7 Orthogonality -- Exercises -- 4 Distances and Nearest Neighbors -- 4.1 Metrics -- 4.2 Lp Distances and their Relatives -- 4.2.1 Lp Distances -- 4.2.2 Mahalanobis Distance -- 4.2.3 Cosine and Angular Distance -- 4.2.4 KL Divergence -- 4.3 Distances for Sets and Strings -- 4.3.1 Jaccard

Distance -- 4.3.2 Edit Distance -- 4.4 Modeling Text with Distances -- 4.4.1 Bag-of-Words Vectors -- 4.4.2 k-Grams -- 4.5 Similarities -- 4.5.1 Set Similarities -- 4.5.2 Normed Similarities -- 4.5.3 Normed Similarities between Sets -- 4.6 Locality Sensitive Hashing -- 4.6.1 Properties of Locality Sensitive Hashing -- 4.6.2 Prototypical Tasks for LSH -- 4.6.3 Banding to Amplify LSH -- 4.6.4 LSH for Angular Distance -- 4.6.5 LSH for Euclidean Distance -- 4.6.6 Min Hashing as LSH for Jaccard Distance -- Exercises -- 5 Linear Regression -- 5.1 Simple Linear Regression -- 5.2 Linear Regression with Multiple Explanatory Variables -- 5.3 Polynomial Regression -- 5.4 Cross-Validation.
5.4.1 Other ways to Evaluate Linear Regression Models -- 5.5 Regularized Regression -- 5.5.1 Tikhonov Regularization for Ridge Regression -- 5.5.2 Lasso -- 5.5.3 Dual Constrained Formulation -- 5.5.4 Matching Pursuit -- Exercises -- 6 Gradient Descent -- 6.1 Functions -- 6.2 Gradients -- 6.3 Gradient Descent -- 6.3.1 Learning Rate -- 6.4 Fitting a Model to Data -- 6.4.1 Least Mean Squares Updates for Regression -- 6.4.2 Decomposable Functions -- Exercises -- 7 Dimensionality Reduction -- 7.1 Data Matrices -- 7.1.1 Projections -- 7.1.2 Sum of Squared Errors Goal -- 7.2 Singular Value Decomposition -- 7.2.1 Best Rank-k Approximation of a Matrix -- 7.3 Eigenvalues and Eigenvectors -- 7.4 The Power Method -- 7.5 Principal Component Analysis -- 7.6 Multidimensional Scaling -- 7.6.1 Why does Classical MDS work? -- 7.7 Linear Discriminant Analysis -- 7.8 Distance Metric Learning -- 7.9 Matrix Completion -- 7.10 Random Projections -- Exercises -- 8 Clustering -- 8.1 Voronoi Diagrams -- 8.1.1 Delaunay Triangulation -- 8.1.2 Connection to Assignment-Based Clustering -- 8.2 Gonzalez's Algorithm for k-Center Clustering -- 8.3 Lloyd's Algorithm for k-Means Clustering -- 8.3.1 Lloyd's Algorithm -- 8.3.2 k-Means++ -- 8.3.3 k-Mediod Clustering -- 8.3.4 Soft Clustering -- 8.4 Mixture of Gaussians -- 8.4.1 Expectation-Maximization -- 8.5 Hierarchical Clustering -- 8.6 Density-Based Clustering and Outliers -- 8.6.1 Outliers -- 8.7 Mean Shift Clustering -- Exercises -- 9 Classification -- 9.1 Linear Classifiers -- 9.1.1 Loss Functions -- 9.1.2 Cross-Validation and Regularization -- 9.2 Perceptron Algorithm -- 9.3 Support Vector Machines and Kernels -- 9.3.1 The Dual: Mistake Counter -- 9.3.2 Feature Expansion -- 9.3.3 Support Vector Machines -- 9.4 Learnability and VC dimension -- 9.5 kNN Classifiers -- 9.6 Decision Trees -- 9.7 Neural Networks.
9.7.1 Training with Back-propagation -- 10 Graph Structured Data -- 10.1 Markov Chains -- 10.1.1 Ergodic Markov Chains -- 10.1.2 Metropolis Algorithm -- 10.2 PageRank -- 10.3 Spectral Clustering on Graphs -- 10.3.1 Laplacians and their EigenStructures -- 10.4 Communities in Graphs -- 10.4.1 Preferential Attachment -- 10.4.2 Betweenness -- 10.4.3 Modularity -- Exercises -- 11 Big Data and Sketching -- 11.1 The Streaming Model -- 11.1.1 Mean and Variance -- 11.1.2 Reservoir Sampling -- 11.2 Frequent Items -- 11.2.1 Warm-Up: Majority -- 11.2.2 Misra-Gries Algorithm -- 11.2.3 Count-Min Sketch -- 11.2.4 Count Sketch -- 11.3 Matrix Sketching -- 11.3.1 Covariance Matrix Summation -- 11.3.2 Frequent Directions -- 11.3.3 Row Sampling -- 11.3.4 Random Projections and Count Sketch Hashing -- Exercises -- Index.

3. Record Nr. UNINA9910629296903321

Autore	Ho Anna Y. Q.
Titolo	The landscape of relativistic stellar explosions / / Anna Y. Q. Ho
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	9783031153679 9783031153662
Descrizione fisica	1 online resource (316 pages)
Collana	Springer theses
Disciplina	522.6862
Soggetti	Gamma ray bursts Relativistic astrophysics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Supervisor's Foreword -- Acknowledgments -- Parts of This Thesis Have Been Published in the Following Journal Articles -- Contents -- 1 Introduction and Summary -- 1.1 Landscape Overview -- The GRB View -- The Ic-BL SN View -- Radio Unification Efforts -- 1.2 Summary of Thesis -- References -- Part I Afterglows at Cosmological Distances -- 2 ZTF20aajnksq (AT2020blt): A Fast Optical Transient at z 2.9 With No Detected Gamma-Ray Burst Counterpart -- 2.1 Introduction -- 2.2 Observations -- ZTF Discovery -- Follow-up Observations -- Optical Imaging -- Optical Spectroscopy -- X-Ray Observations -- Radio Observations -- Search for Associated GRB -- 2.3 Comparison to GRB Afterglows -- Optical Light Curve -- Spectral Energy Distribution -- Radio Light Curve -- 2.4 Interpretation -- A Slightly Off-Axis GRB -- A Dirty Fireball -- 2.5 Summary and Conclusions -- References -- 3 iPTF Archival Search for Fast Optical Transients -- 3.1 Introduction -- 3.2 Data and Candidate Selection -- 3.3 Properties of the iPTF M-dwarf Flares -- 3.4 Rate of Relativistic Fast Optical Transients in iPTF -- 3.5 Conclusions -- 3.6 Appendix -- References -- Part II Low-Luminosity Gamma-Ray Bursts -- 4 SN2020bvc: A Broad-Lined Type Ic Supernova with a Double-Peaked Optical Light Curve and a Luminous X-ray and Radio Counterpart -- 4.1 Introduction -- 4.2 Observations -- ZTF Detection and

Classification -- Host Galaxy -- Optical Photometry -- Spectroscopy -- UV and X-Ray Observations -- Submillimeter and Radio Observations -- Search for a Gamma-Ray Burst -- 4.3 Light Curve Analysis -- Comparisons to Other Ic-BL SNe -- Blackbody Fits -- 4.4 Spectroscopic Properties -- Spectroscopic Evolution and Comparisons -- Velocity Estimates from Fe II Features -- 4.5 Modeling the Light Curve -- Nickel Decay -- Shock-Cooling -- 4.6 Modeling the Fast Ejecta -- Radio Emission.
X-Ray Emission -- 4.7 Early ZTF Light Curves of Nearby Ic-BL SNe -- 4.8 Summary and Discussion -- 4.9 Appendix -- Photometry Table -- Details: Mass and Radius of the Extended Material -- Details: Properties of the Forward Shock -- Inverse Compton Scattering -- References -- Part III Ic-BL Supernovae -- Reference -- 5 The Broad-Lined Ic Supernova ZTF18aaqjovh (SN2018bvw): An Optically Discovered Engine-Driven Supernova Candidate with Luminous Radio Emission -- 5.1 Introduction -- 5.2 Observations -- Zwicky Transient Facility Discovery -- Spectral Classification -- Radio Observations -- X-Ray Observations -- Search for Gamma-Rays -- 5.3 Analysis and Discussion -- Modeling the Optical Light Curve -- Properties of the Fastest (Radio-Emitting) Ejecta -- Modeling the Radio to X-Ray SED -- Gamma-Ray Burst -- 5.4 Summary and Conclusions -- References -- 6 Evidence for Late-Stage Eruptive Mass Loss in the Progenitor to SN2018gep, a Broad-Lined Ic Supernova: Pre-explosion Emission and a Rapidly Rising Luminous Transient -- 6.1 Introduction -- 6.2 Observations -- Zwicky Transient Facility Discovery -- Photometry -- Spectroscopy -- Search for Pre-discovery Emission -- Radio Follow-up -- X-ray Follow-Up -- Search for Prompt Gamma-Ray Emission -- Host Galaxy Data -- 6.3 Basic Properties of the Explosion and Its Host Galaxy -- Physical Evolution from Blackbody Fits -- Spectral Evolution and Velocity Measurements -- Comparisons to Early Spectra in the Literature -- Origin of the ``W'' Feature -- Photospheric Velocity from Ic-BL Spectra -- Properties of the Host Galaxy -- 6.4 Interpretation -- Radioactive Decay -- Interaction with Extended Material -- 6.5 Comparison to Unclassified Rapidly Evolving Transients at High Redshift -- 6.6 Summary and Future Work -- 6.7 Appendix -- UV and Optical Photometry -- UV and Optical Spectroscopy -- Atomic Data for Spectral Modeling.
Data for Measuring Host Properties -- References -- Part IV A New Class of Energetic Stellar Explosions in a Dense Medium -- 7 AT2018cow: A Luminous Millimeter Transient -- 7.1 Introduction -- The Transient Millimeter Sky -- AT2018cow -- 7.2 Observations -- Radio and Submillimeter Observations -- The Submillimeter Array (SMA) -- The Australia Telescope Compact Array (ATCA) -- The Atacama Large Millimeter/Submillimeter Array (ALMA) -- X-Ray Observations -- Swift/XRT -- NuSTAR -- 7.3 Basic Properties of the Shock -- Light Curve -- Modeling the Radio to Submillimeter SED -- 7.4 Implications of Shock Properties -- AT2018cow in Velocity-Energy Space and a Discussion of Epsilons -- A Luminous Millimeter Transient in a Dense Environment -- Novel Features of the Synchrotron Model Parameters -- 7.5 Origin of the X-ray Emission and Emergence of a Compact Source -- 7.6 Conclusions and Outlook -- 7.7 Appendix -- ALMA Band 9 Calibration -- Full SMA Light Curves -- Selection of Peak Frequency and Peak Luminosity for Other Transients -- References -- 8 The Koala: A Fast Blue Optical Transient with Luminous Radio Emission from a Starburst Dwarf Galaxy at z=0.27 -- 8.1 Introduction -- 8.2 Discovery and Basic Analysis -- Optical -- Photometry -- Spectroscopy and Host-Galaxy Properties -- Radio Observations -- 8.3 Comparison with Extragalactic Explosions -- Optical Light Curve and Spectrum --

Radio Light Curve -- A Starburst Host Galaxy -- 8.4 Interpretation -- Modeling the Optical Light Curve -- Modeling the Radio Light Curve -- Progenitor Systems and a Search for an Associated Gamma-ray Burst -- 8.5 Rate Estimate -- 8.6 Prospects for Detecting X-Ray Emission -- 8.7 Summary and Conclusions -- 8.8 Appendix -- Light Curve Measurements -- References -- 9 Other Contributions -- 9.1 ZTF19abvizsw: A Cosmological Afterglow with No Detected Gamma-Ray Burst.
9.2 How Much CSM Is Sufficient to Choke a Jet? -- 9.3 Radio Observations of Ic-BL SNe Discovered by ZTF -- References -- 10 Summary and the Future.
