## Sommario/riassunto

Since the beginning of recorded history, law and religion have provided ""rules"" that define good behavior. When we obey such rules, we assign to some external authority the capacity to determine how we should act. Even anarchists recognize the existence of a choice as to whether or not to obey, since no one has seriously doubted that the source of social order resides in our vast ethical systems. Debate has focused only on whose system is best, never for an instant imagining that law, religion, or some philosophical permutation of either was not the basis of prosocial action. The only diverg
