Descrizione fisica	1 online resource (181 pages)
Disciplina	940.531813409498
Soggetti	Jews Forced labor HISTORY / Holocaust World War, 1939-1945 - Jews - Romania Jews - Romania - History - 20th century Forced labor - Romania - History - 20th century History Electronic books. Romania
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	"Work in the community interest" -- Trial and error -- The "review of the working Jews" -- In the shadow of Belzec -- The apogee -- Travails ended, Justice averted.
Sommario/riassunto	"Between Romania's entry into World War II in 1941 and the ouster of dictator Ion Antonescu three years later, over 105,000 Jews were forced to work in internment and labor camps, labor battalions, government institutions, and private industry. Particularly for those in the labor battalions, this period was characterized by extraordinary physical and psychological suffering, hunger, inadequate shelter, and dangerous or even deadly working conditions. And yet the situation that arose from the combination of Antonescu's paranoias and the peculiarities of the Romanian system of forced-labor organization meant that most Jewish

laborers survived. Jewish Forced Labor in Romania explores the ideological and legal background of this system of forced labor, its purpose, and its evolution. Author Dallas Michelbacher examines the relationship between the system of forced labor and the Romanian government's plans for the "solution to the Jewish question." In doing so, Michelbacher highlights the key differences between the Romanian system of forced labor and the well-documented use of forced labor in Nazi Germany and neighboring Hungary. Jewish Forced Labor in Romania explores the internal logic of the Antonescu regime and how it balanced its ideological imperative for antisemitic persecution with the economic needs of a state engaged in total war whose economy was still heavily dependent on the skills of its Jewish population"--

Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Sommario/riassunto	¿ Puede distinguirse al delincuente por su estructura craneal o por sus rasgos genéticos? ¿Surge el crimen de la desorganización moral existente en las áreas intersticiales de la ciudad? ¿Arranca la desviación de un proceso de estigmatización social? ¿Caminamos hacia un estado penal neoliberal que fomenta hiperghetos? ¿Puede hablarse de subculturas de la marginación y de la pobreza? ¿Son las bandas juveniles organizaciones culturales o bien son solo grupos criminales? ¿Tiene el cine algo que enseñarnos sobre el crimen? ¿Qué podemos

aprender de películas como Los Olvidados, de Luis Buñuel, o El Padrino, de Francis F. Coppola? Este ensayo intenta responder algunas de estas preguntas, esbozando el mapa de una antropología criminal en construcción. Para ello, observa la sociedad contemporánea desde los márgenes ?desde los bajos fondos?, aportando interpretaciones teóricas, estudios de caso y recursos didácticos para comprender las intricadas relaciones entre delincuencia y marginalidad.

Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. [xix]-xxi) and index.
Nota di contenuto	Front matter -- Preface -- Foreword -- Foreword to the English Edition -- Translator’s Acknowledgments -- TABLE OF CONTENTS -- General Bibliography -- Notation -- CHAPTER I: DIFFUSION AND DRIFT -- CHAPTER II: ATOMIC THEORY OF DIFFUSION -- CHAPTER III: DIFFUSION MECHANISMS AND CORRELATION EFFECTS -- CHAPTER IV: SELF-DIFFUSION -- CHAPTER V: SOLUTE DIFFUSION IN PURE MATERIALS. DIFFUSION IN ALLOYS -- CHAPTER VI: DIFFUSION AND DRIFT IN ALLOYS AND COMPOUNDS -- CHAPTER VII: DIFFUSION IN MEDIA OF LOWER DIMENSIONALITY -- CHAPTER VIII: PHENOMENOLOGICAL THEORY OF DIFFUSION -- CHAPTER IX: TECHNIQUES FOR THE STUDY OF DIFFUSION -- CHAPTER X: THE STUDY OF SOME DIFFUSION-CONTROLLED PROCESSES -- EXERCISES -- INDEX
Sommario/riassunto	The present book is the result of diverse courses on diffusion. It is intended to give as complete an overview as possible of diffusion in solid media, while relating the process of diffusion to both their physical bases and their applications. A series of a real situations is covered in this account, from self-diffusion of radiotracers to the more complex cases of mass flow under chemical or thermal gradients or under electric fields, or diffusion in structures of lower dimensionality

(surfaces and interfaces). In all these analyses, no category of materials was favored; metals, ionic crystals, oxydes, and semiconductors all had their turn. Only polymers were not specifically touched. One chapter is specifically devoted to techniques for studying diffusion, including methods of numerical simulation, and a last and long chapter gives a number of metallurgical phenomena in which diffusion plays a fundamental role.
