1. Record Nr. UNISALENTO991003436459707536

Autore	Volli, Ugo
Titolo	Manuale di semiotica / Ugo Volli
Pubbl/distr/stampa	[Roma] : Laterza, [c. 2000]
ISBN	8842059536
Descrizione fisica	378 p. ; 21 cm.
Collana	Manuali Laterza ; 128
Disciplina	401.41
Soggetti	Semiotica
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr. UNISALENTO991001398909707536

Autore	Cattaneo Gasparini, Ida
Titolo	Sulla geometria delle varietà differenziabili : atti del convegno tenuto a Roma, 17-21 Settembre, 1984 / ed. Ida Cattaneo Gasparini
Pubbl/distr/stampa	Bologna : Pitagora, 1985
ISBN	883710328X
Descrizione fisica	vii, 167 p. ; 25 cm.
Classificazione	AMS 53-06 AMS 53-XX AMS 58-06
Soggetti	Differential geometry - Congresses
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

3. Record Nr. UNINA9910404088903321

Autore	Mattiello Silvana
Titolo	Positive Aspects of Animal Welfare
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2020
ISBN	3-03928-533-5
Descrizione fisica	1 online resource (180 p.)
Soggetti	Biology, life sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Comfort during resting, half-closed eyes when feeding on highly palatable feed, or vigorous tail wagging when being brushed are some of the positive indicators that can be used to evaluate the quality of the environment in which domestic animals live. This has been a radical shift from the past as, until now, the welfare assessment on farms has meant assessing negative indicators, namely the number of lame animals, presence of lesions, or frequency of agonistic behaviours. However, the latest research confirms that the absence of a problem or of suffering does not necessarily imply that the animals are experiencing a good life and that their level of welfare is high. To guarantee high welfare standards, animals should experience positive conditions that allow them to live a "life worth living", and positive indicators are needed to identify these conditions. This Special Issue focuses on the development and validation of indicators of positive welfare or on the refinement of the existing ones, as well as on the identification of suitable living conditions for providing positive welfare to farmed and companion animals.
