1. Record Nr. UNINA9910574098803321

Titolo	Microbial metal and metalloid metabolism [[electronic resource]] : advances and applications / / edited by John F. Stolz and Ronald S. Oremland
Pubbl/distr/stampa	Washington, D.C., : ASM Press, c2011
ISBN	1-68367-101-5 1-61344-403-6 1-55581-719-X
Descrizione fisica	1 online resource (404 p.)
Altri autori (Persone)	StolzJohn F OremlandR. S (Ronald S.)
Disciplina	572.429
Soggetti	Microbial metabolism Microorganisms - Composition Organometallic compounds
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Contents; Contributors; Preface; 1. Geochemical Reactivity of Bacterial surfaces: a Tribute; I. ENVIRONMENTS; 2. From Geocycles to Genomes and Back; 3. Hyperthermophile-Metal Interactions in Hydrothermal Environments; 4. Microbe-Metal Interactions on seafloor Basalts; 5. Microbial Transformations of Arsenic in the subsurface; II. PROCESSES; 6. Mineralogical Controls on Microbial Reduction of Fe(III) (Hydr)oxides; 7. Microorganisms and Processes Linked to Uranium Reduction and Immobilization; 8. Direct and Indirect Processes Leading to Uranium(IV) Oxidation 9. Anaerobic Respiratory Iron(II) Oxidation10. Accentuate the Positive: Dissimilatory Iron Reduction by Gram-Positive Bacteria; 11. Regulation of Arsenic Metabolic Pathways in Prokaryotes; III. NEW TECHNOLOGIES; 12. Transcriptome Analysis of Metal-Reducing Bacteria; 13. Application of Proteomics in Bioremediation; 14. Monitoring Microbial Activity with GeoChip; 15. Methods for Detection of Arsenate-Respiring Bacteria: Advances, Cautions, and Caveats; 16. Nanoparticles Formed from Microbial Oxyanion Reduction of Toxic Group 15 and Group 16

Metalloids

17. Microbial Respiration of Anodes and Cathodes in Electrochemical CellsIndex; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; R; S; T; U; V; W

Sommario/riassunto

The ideal reference for novice and experienced investigators interested in environmental biogeochemistry and bioremediation.
