1. Record Nr. UNINA9910626498003321

Autore	Wolff, Hans Julius
Titolo	[Recensione a:] Hans Joachim Mette - Ius Civile in Artem Redactum / Wolff Hans Julius
Pubbl/distr/stampa	Munchen, : C.H. Beck'sche, 1956
Descrizione fisica	p. 374-379 : 8°
Collana	Estratto da Ivra
Disciplina	481
Locazione	FGBC
Collocazione	Bbl. Solazzi Busta W 17
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr. UNINA9910583460803321

Autore	Wang Ting
Titolo	Integrated gasification combined cycle (IGCC) technologies / / edited by Ting Wang, Gary Stiegel
Pubbl/distr/stampa	Wlatham, MA : , : Elsevier, , [2017] ©2017
ISBN	0-08-100185-1 0-08-100167-3
Edizione	[1st edition]
Descrizione fisica	1 online resource (929 pages) : color illustrations
Collana	Woodhead publishing series in energy
Soggetti	Gas industry Coal gasification
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

Integrated Gasification Combined Cycle (IGCC) Technologies discusses this innovative power generation technology that combines modern coal gasification technology with both gas turbine and steam turbine power generation, an important emerging technology which has the potential to significantly improve the efficiencies and emissions of coal power plants. The advantages of this technology over conventional pulverized coal power plants include fuel flexibility, greater efficiencies, and very low pollutant emissions. The book reviews the current status and future developments of key technologies involved in IGCC plants and how they can be integrated to maximize efficiency and reduce the cost of electricity generation in a carbon-constrained world. The first part of this book introduces the principles of IGCC systems and the fuel types for use in IGCC systems. The second part covers syngas production within IGCC systems. The third part looks at syngas cleaning, the separation of CO2 and hydrogen enrichment, with final sections describing the gas turbine combined cycle and presenting several case studies of existing IGCC plants. Provides an in-depth, multi-contributor overview of integrated gasification combined cycle technologies Reviews the current status and future developments of key technologies involved in IGCC plants Provides several case studies of existing IGCC plants around the world
