Sommario/riassunto	This book presents a wide range of contemporary theories borrowed from Cultural Studies augmented with practical implications that support dramatic artists in their struggle to create possible multiple realities for a postmodern future. Teachers, directors, writers, students, and many others involved in the dramatic arts will benefit from the discussions of Cultural Studies and the connections to the Dramatic Arts. The first chapters mix theory and practice while the last chapter provides questioning strategies and conventions that can be used in actual sessions to deconstruct scripted or imp

Sommario/riassunto

Bernhard Georg Andermuller (1644-1717), envoy of Dessau, and Michel Herstal de la Tache drew fascinating maps/plans of early modern Vienna. We see on the one hand the working environments of an early modern envoy on these plan but also the fortification of the town and the suburbs around 1700 can still be clearly felt.

Sommario/riassunto	This special issue of Key Engineering Materials contains selected refereed papers presented at the Seventh International Conference on Advanced Computational Engineering and Experimenting (ACE-X 2013) held at NH Ribera del Manzanares (Madrid), Spain during the period 1 st - 4th July, 2013. The goal of the conference was to provide a unique opportunity to exchange information, to present the latest results as well as to review the relevant issues on contemporary research in mechanical engineering. Young scientists were especially encouraged to attend the conference and to establish international
