Descrizione fisica	1 online resource (350 pages) : illustrations; digital, PDF file(s)
Soggetti	Interpersonal relations Love - Social aspects Internet - Sociological aspects
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	The Internet and online social world have become the intermediaries of contemporary intimacy. Second Life offers exactly that, a 'second life', but in the virtual universe. This book delves into the use of this platform to understand the experiences of those who participate in a relationship there. How do communicational tools contribute to the organization of intimate exchanges? What do these relationships reveal about the experiences of modern romantic bonds? Drawing on the sociology of couples together with emotions and techniques, this research considers Second Life as both the developer and operator of contemporary intimacy. It addresses a subject at the center of current affairs with an analysis of relational practices that remains little studied at present.
