Thinking Clearly for a Modern Democracy: Susan Stebbing and Otto Neurath. |
| Sommario/riassunto | This volume presents a collection of newly commissioned essays on the work of Susan Stebbing (1885–1943). Stebbing was an important figure in the development of analytic philosophy in the first half of the twentieth century, and a pioneer of the social utility of philosophy and of the application of logical analysis to critical inquiry into language use. The separate studies of Stebbing’s work included in this volume offer fresh perspectives across three broad topics: logic and Cambridge |

Analysis; idealism, realism and the philosophy of science; and public philosophy and social engagement. The volume brings together seven chapters by leading international scholars in the field, along with a contextualising introduction, in order to advance understanding of the importance, originality and continuing significance of Stebbing's remarkable body of work. Susan Stebbing on Logic and nalysis is essential reading for all scholars, researchers and advanced students of the history of analytic philosophy and the philosophy of science. It is also ideal for scholars interested in public philosophy. Siobhan Chapman is Professor of English at the University of Liverpool. Her research interests are in the areas of the philosophy of language, particularly the history of analytic philosophy, and pragmatics, particularly Gricean and neo-Gricean pragmatic theories and their application to literary stylistics.
