1. Record Nr. UNISALENTO991001624449707536

Autore	Vineis, Edoardo
Titolo	Il latino / Edoardo Vineis.
Pubbl/distr/stampa	Bologna : Il Mulino, 2005
ISBN	8815106774
Descrizione fisica	103 p. : c. geog. ; 20 cm
Collana	Introduzioni. Linguistica
Disciplina	470
Soggetti	Lingua latina - Grammatica
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Giàpubbl. in: Le lingue indoeuropee / a cura di A. Giacalone Ramat e P. Ramat, Bologna : Il Mulino, 1993, pp. 289-348
Nota di bibliografia	Bibliografia: p. 101-103

2. Record Nr. UNISALENTO991002400629707536

Autore	Gerschenkron, Alexander
Titolo	La continuità storica : teoria e storia economica / Alexander Gerschenkron ; traduzioni di Aldo Serafini e Sergio Caprioglio
Pubbl/distr/stampa	Torino : Einaudi, 1976
Descrizione fisica	XV, 489 p. ; 21 cm.
Collana	Einaudi paperbacks ; 69
Altri autori (Persone)	Caprioglio, Sergio Serafini, Aldo
Disciplina	330.9
Soggetti	Economia - Storia Politica e economia
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Tit. orig.: Continuity in history and other essays

3. Record Nr. UNINA9910337875803321

Autore	Rebohle Lars
Titolo	Flash Lamp Annealing : From Basics to Applications / / by Lars Rebohle, Slawomir Prucnal, Denise Reichel
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-23299-9
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (xviii, 288 pages)
Collana	Springer Series in Materials Science, , 0933-033X ; ; 288
Disciplina	621.38152 620.11
Soggetti	Semiconductors Optical materials Electronics - Materials Manufactures Lasers Photonics Microwaves Optical engineering Nanotechnology Optical and Electronic Materials Manufacturing, Machines, Tools, Processes Optics, Lasers, Photonics, Optical Devices Microwaves, RF and Optical Engineering Nanotechnology and Microengineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Technological background -- Basic components -- Flash lamps -- Process management and process control -- FLA assisted deposition -- Temperature -- Thermal budget -- Temperature measurements -- Temperature simulations -- FLA for semiconductors -- Defect engineering -- Doping -- Crystallization -- Semiconductor nanostructures -- Beyond semiconductors -- Transparent conducting oxides -- Metallic films -- High-k materials and dielectrics -- Flexible

substrates -- Outlook.

Sommario/riassunto

This book provides a comprehensive survey of the technology of flash lamp annealing (FLA) for thermal processing of semiconductors. It gives a detailed introduction to the FLA technology and its physical background. Advantages, drawbacks and process issues are addressed in detail and allow the reader to properly plan and perform their own thermal processing. Moreover, this books gives a broad overview of the applications of flash lamp annealing, including a comprehensive literature survey. Several case studies of simulated temperature profiles in real material systems give the reader the necessary insight into the underlying physics and simulations. This book is a valuable reference work for both novice and advanced users.
