Note generali

"Quick answers to common problems"--Cover.
Includes index.

Nota di contenuto

Cover; Copyright; Credits; About the Authors; About the Reviewers; www.PacktPub.com; Table of Contents; Preface; Chapter 1: Creating a basic OSB service; Introduction; Creating a new OSB project; Defining a folder structure for the OSB project; Importing an already existing project into Eclipse OEPE; Creating a business service to call an external SOAP-based web service; Generating a simple pass-through proxy service; Deploying the OSB configuration from Eclipse OEPE; Testing the proxy service through the OSB console; Testing the proxy service through soapUI

Creating proxy service with a WSDL based interface Using a routing action to statically route to another service; Adding an operational branch to support the different WSDL operations of the proxy service; Using an XQuery transformation to map between the different data models of the services; Chapter 2: Working Efficiently with OSB Artifacts in Eclipse OEPE; Introduction; Setting up an OSB project to work with JCA adapters; Using context menu to add nodes and actions to message flow; Moving nodes/actions in Eclipse OEPE by drag-and-drop; Copying nodes/actions from one place to another

Moving artifacts inside the same OSB project Copying artifacts from one project into another; Debugging services through Eclipse OEPE; Chapter 3: Messaging with JMS Transport; Introduction; Sending a message to a JMS queue/topic; Changing JMS Transport message headers and properties at runtime; Consuming messages from a JMS queue; Consuming messages from a topic with non-durable/durable subscription; Consuming messages from a JMS queue/topic selectively; Accessing JMS Transport headers and properties in message flow; Using request-response messaging with JMS

Using QBrowser Admin GUI for accessing JMS queues/topics Testing JMS with soapUI; Chapter 4: Using EJB and JEJB transport; Introduction; Exposing an EJB session bean as a service on the OSB using the EJB transport; Using JNDI Provider to invoke an EJB session bean on a remote WebLogic domain; Using converter class with EJB transport to help converting data types; Exposing an EJB session bean as an EJB on the OSB using the JEJB transport; Manipulating the response of the JEJB transport by a Java Callout action; Chapter 5: Using HTTP Transport; Introduction

Using HTTP transport to implement messaging over HTTP Exposing a RESTful service on the OSB; Consuming a RESTful service from the OSB; Creating a generic RESTful gateway on the OSB; Implementing a WebSockets transport for server-side push; Chapter 6: Using File and Email Transports; Introduction; Using the File or FTP transport to trigger a proxy service upon arrival of a new file; Using the File JCA adapter to read a file within the message flow; Using the File Transport to write to a file; Using Email Transport to receive e-mail; Using Email Transport to send e-mail

Chapter 7: Communicating with the Database

Sommario/riassunto

This cookbook is full of immediately useable recipes showing you how to develop service and message-oriented (integration) applications on the Oracle Service Bus. In addition to its cookbook style, which ensures the solutions are presented in a clear step-by-step manner, the explanations go into great detail, which makes it good learning material for everyone who has experience in OSB and wants to improve. Most of the recipes are designed in such a way that each recipe is presented as a separate, standalone entity and reading of prior recipes

is not required. The finished solution of each
