Sommario/riassunto	Ascriptions of mental states to oneself and others give rise to many interesting logical and semantic problems. Attitude Problems presents an original account of mental state ascriptions that are made using intensional transitive verbs such as 'want', 'seek', 'imagine', and 'worship'. Forbes offers a theory of how such verbs work that draws on ideas from natural language semantics, philosophy of language, and aesthetics. - ;Ascriptions of mental states to oneself and others give rise to many interesting logical and semantic problems. Sommario/riassunto

"Cam" Townsend is rightly known as the visionary founder of the Summer Institute of Linguistics (SIL) and the Wycliffe Bible Translators. This joint effort is now the largest Protestant mission organization in the world, a mission which has dramatically changed the culture of what used to be known as faith missions. Townsend revolutionized Protestant missions by emphasizing that missionaries needed to learn the language of the people to whom they were sent and to live among them in order to understand their communities. His system stressed training the missionaries
