The Path of an Islamic Activist -- Conclusion |
| Sommario/riassunto | <p>This original and historically rich book examines the influence of gender in shaping the Egyptian nation from the nineteenth century through the revolution of 1919 and into the 1940's. In Egypt as a Woman, Beth Baron divides her narrative into two strands: the first analyzes the gendered language and images of the nation, and the second considers the political activities of women nationalists. She shows that, even though women were largely excluded from participation in the state, the visual imagery of nationalism was replete with female figures. Baron juxtaposes the idealization of the family and the feminine in nationalist rhetoric with transformations in elite households and the work of women activists striving for national independence.</p> |

Deduction of Eq. (9.3.14); Appendix G.1 Calculation of the Integral /1
and /2 in Eqs. (12.4.7; 14); Index

Sommario/riassunto

Introduction to Molecular Beams Gas Dynamics is devoted to the theory and phenomenology of supersonic molecular beams. The book describes the main physical idea and mathematical methods of the gas dynamics of molecular beams, while the detailed derivation of results and equations is accompanied by an explanation of their physical meaning. The phenomenology of supersonic beams can appear complex to those not experienced in supersonic gas dynamics and the few existing reviews on the topic generally presume specific knowledge of the subject. The book begins with a quantitative description of the

Sommario/riassunto

"Gods in the Desert" explores the fascinating religious cultures of the ancient Near East. From the mysterious pyramids, tombs, and temples of Egypt to the powerful heroes, gods, and legends of Mesopotamia, Glenn Holland guides readers through the early religions of Egypt, Mesopotamia, and Syria-Palestine.
