

1. Record Nr.	UNIBAS000034896
Autore	Peterson, William H.
Titolo	Biochimica degli alimenti / William H. Peterson, John T. Skinner, Frank M. Strong ; tradotto dal Dott. Franco Rossi
Pubbl/distr/stampa	Roma : De Carlo, 1946
Descrizione fisica	352 p. ; 20 cm
Collana	La specola ; 2
Altri autori (Persone)	Skinner, John T. Strong, Frank M.
Disciplina	641.3
Soggetti	Alimenti - Biochimica
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2.	Record Nr.	UNIBAS000020852
	Autore	Némirovsky, Irène
	Titolo	Jézabel : roman / Irène Némirovsky
	Pubbl/distr/stampa	Paris : Albin Michel, 2007
	ISBN	978-2-226-15967-0
	Descrizione fisica	265 p. ; 21 cm.
	Disciplina	843.9
	Lingua di pubblicazione	Francese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
3.	Record Nr.	UNINA9910464862803321
	Autore	Gantz Stephen D
	Titolo	The basics of IT audit : purposes, processes, and practical information / / Stephen D. Gantz ; technical editor, Steve Maske
	Pubbl/distr/stampa	Amsterdam, [Netherlands] : , : Syngress, an imprint of Elsevier, , [2014] ©2014
	ISBN	0-12-417176-1
	Edizione	[1st edition]
	Descrizione fisica	1 online resource (271 p.)
	Collana	The basics
	Altri autori (Persone)	MaskeSteve
	Disciplina	004.068/1
	Soggetti	Information technology - Auditing Computer security Computer networks - Security measures Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Machine generated contents note: Fundamentals/Key Concepts Auditing in Context Internal Auditing External Auditing Types of Audits

Sommario/riassunto

"Dependence on information technology (IT) is a characteristic common to virtually all modern organizations. Organizations rely on information, and the processes and enabling technology needed to use and effectively manage information. This reliance characterizes public and private sector organizations, regardless of mission, industry, geographic location, or organization type. IT is critical to organizational success, operating efficiency, competitiveness, and even survival, making imperative the need for organizations to ensure the correct and effective use of information technology. In this context it is important that resources are efficiently allocated, that IT functions at a sufficient level of performance and quality to effectively support the business, and that information assets are adequately secured consistent with the risk tolerance of the organization. Such assets must also be governed effectively, meaning that they operate as intended, work correctly, and function in a way that complies with applicable regulations and standards. IT auditing can help organizations achieve all of these objectives"--
