

1. Record Nr.	UNIBAS000026709
Autore	Keats, John
Titolo	Liriche scelte ed annotate da Cino Chiarini / John Keats
Pubbl/distr/stampa	Firenze : Vallecchi, 1925
Descrizione fisica	116 p. ; 20 cm
Collana	Classici stranieri commentati
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Lire 7
2. Record Nr.	UNINA9910824331503321
Titolo	Cytomegaloviruses . Volume II : from molecular pathogenesis to intervention // edited by Matthias J. Reddehase ; with the assistance of Niels A.W. Lemmermann
Pubbl/distr/stampa	Norfolk, England : , : Caister Academic Press, , [2013] ©2013
ISBN	1-912530-37-6 1-908230-85-1
Descrizione fisica	1 online resource (559 p.)
Disciplina	616.925
Soggetti	Cytomegalovirus infections
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Contents Volume II; Abbreviations used in Volume II; Ch II.1: Synopsis of Clinical Aspects of Human Cytomegalovirus Disease; Ch II.2: The Epidemiology and Public Health Impact of Congenital Cytomegalovirus Infection; Ch II.2 - Addendum: The Economic Impact of Congenital CMV

Infection: Methods and Estimates; Ch II. 3: Clinical Cytomegalovirus Research: Congenital Infection; Ch II. 4: Cytomegalovirus Replication in the II.4Developing Human Placenta; Ch II.5: The Guinea Pig Model of Congenital Cytomegalovirus Infection; Ch II. 6: Murine Model of Neonatal Cytomegalovirus Infection
Ch II.7: Adaptive Cellular Immunity to Human II.7CytomegalovirusCh II. 8: Natural Killers Cells and Human Cytomegalovirus; Ch II.9: Innate Immunity to Cytomegalovirus in the Murine Model; Ch II.10: Protective Humoral Immunity; Ch II.11: Immunoregulatory Cytokine Networks Discovered and Characterized during Murine Cytomegalovirus Infections; Ch II.12: Host Genetic Models in Cytomegalovirus Immunology; Ch II.13: Clinical Cytomegalovirus Research: Thoracic Organ Transplantation; Ch II.14: Clinical Cytomegalovirus Research: Liver and Kidney Transplantation
Ch II.15: The Rat Model of Cytomegalovirus Infection and Vascular DiseaseCh II.16: Clinical Cytomegalovirus Research: Haematopoietic Cell Transplantation; Ch II.17: Murine Model for Cytoimmunotherapy of CMV Disease after Haematopoietic Cell Transplantation; Ch II.18: State of the Art and Trends in Cytomegalovirus Diagnostics; Ch II.19: Antiviral Therapy, Drug Resistance and Computed Resistance Profiling; Ch II 20: Cytomegalovirus Vaccine: On the Way to the Future?; Ch II.21: Vaccine Vectors Using the Unique Biology and Immunology of Cytomegalovirus
Ch II.22: Non-Human-Primate Models of Cytomegalovirus Infection, Prevention, and TherapyCh II. 23: Putative Disease Associations with Cytomegalovirus: a Critical Survey; Epilogue - Resume and Visions: From CMV Todayto CMV Tomorrow; Subject index; Open reading frame index; Cluster of differentiation index; CMV strains index; Antiviral drugs index; Frequently discussed molecules

Sommario/riassunto

Human Cytomegalovirus (CMV) - a member of the herpesvirus family - is an underrated health risk. A low public awareness results from the relatively mild symptoms it causes in otherwise healthy people whose immune systems are intact, with primary infection usually going unnoticed. During pregnancy, however, transmission from the mother to the fetus is currently the most frequent viral cause of birth defects with lifelong neurological sequelae, sensorineural hearing loss in particular. People at risk also include the growing number of immune compromised patients requiring either a solid organ gr
