| 1. Record Nr. | UNIBAS000027633 |
| Autore | Vincent, Bernard |
| Titolo | Amistad : les mutins de la liberté / Bernard Vincent |
| Pubbl/distr/stampa | Paris : <<L'>>Archipel, c1998 |
| ISBN | 2-84187-104-5 |
| Descrizione fisica | 268 p., [4] c. di tav. : ill. ; 23 cm. |
| Disciplina | 973.5 |
| Soggetti | Nave Amistad - Ammutinamento |
| Lingua di pubblicazione | Francese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| 2. Record Nr. | UNINA9910144654903321 |
| Titolo | Brush border membranes [[electronic resource]] |
| Pubbl/distr/stampa | London, : Pitman, c1983 |
| ISBN | 1-280-78402-4
9786613694416
0-470-72076-X
0-470-71846-3 |
| Descrizione fisica | 1 online resource (352 p.) |
| Collana | Ciba Foundation symposium ; ; v. 95 |
| Altri autori (Persone) | PorterRuth
CollinsGeraldyn M |
| Disciplina | 611.0181
611/.0181 |
| Soggetti | Cell membranes
Cell physiology |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Editors: Ruth Porter (Organizer) and Geraldyn M. Collins.
Proceedings of Symposium on: Brush border membranes held at the |

Ciba Foundation, London, 8-10 June 1982.

Nota di bibliografia

Includes bibliographical references and indexes.

Nota di contenuto

Brush border membranes; Contents; Chairman's introduction; Introductory remarks on the brush border; Microvillar endopeptidase, an enzyme with special topological features and a wide distribution; Discussion; Aminopeptidases and proteolipids of intestinal brush border; Discussion; Structure of microvillar enzymes in different phases of their life cycles; Discussion; Specific labelling of the hydrophobic domain of rat renal γ -glutamyl transferase; Discussion; Biosynthesis and assembly of the largest and major intrinsic polypeptide of the small intestinal brush borders; Discussion
Use of monoclonal antibodies in the study of intestinal structure and function Discussion; Biosynthesis and transport of plasma membrane glyco- proteins in the rat intestinal epithelial cell: studies with sucrase-isomaltase; Discussion; GENERAL DISCUSSION I Biosynthesis and assembly of brush border proteins: (i) some co-translational models for protein insertion into membranes; molecular sizes of brush border enzymes during assembly; Distribution of enteropeptidase and aminopeptidase to non-brush border sites; General functions of the enterocyte
Molecular architecture of the microvillus cytoskeleton Discussion; Structure of human placental microvilli; Discussion; Regulation of cytoskeletal structure and contractility in the brush border; Discussion; Characterization of membrane glycoproteins involved in attachment of microfilaments to the microvillar membrane; Discussion; Structural and functional relationship between the membrane and the cytoskeleton in brush border microvilli; Discussion; GENERAL DISCUSSION II A pathological condition due to congenital disorganization of the brush border
Conformational changes in the α -subunit, and cation transport by Na^+ , K^+ -ATPase Discussion; Properties of immunoglobulin G-Fc receptors from neonatal rat intestinal brush borders; Immunoglobulin G receptors of intestinal brush borders from neonatal rats; Discussion after the preceding two papers; Cotransport systems in the brush border membrane of the human placenta; Discussion; GENERAL DISCUSSION III Cytoskeleton and membrane-cytoskeleton interactions; The importance of structure for understanding the biosynthetic process; Future advances in study of brush border cytoskeleton
Photo-affinity labeling to identify components of the neutral amino acid carrier in the intestinal microvillar membrane Chairman's closing remarks; Index to contributors; Subject index
