

1. Record Nr.	UNIBAS000030485
Autore	Fossen, Haakon <1961- >
Titolo	Structural geology / Haakon Fossen
Pubbl/distr/stampa	New York : Cambridge University Press, 2010
ISBN	9780-521-51664-8
Descrizione fisica	XV, 463 p. : ill. ; 28 cm.
Disciplina	551.8
Soggetti	Tettonica
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>A full-color introduction to the basic principles of structural geology, with unique links to practical applications and e-learning modules. Lavishly illustrated in color, this textbook takes an applied approach to introduce undergraduate students to the basic principles of structural geology. The book provides unique links to industry applications in the upper crust, including petroleum and groundwater geology, which highlight the importance of structural geology in exploration and exploitation of petroleum and water resources. Topics range from faults and fractures forming near the surface to shear zones and folds of the deep crust. Students are engaged through examples and parallels drawn from practical everyday situations, enabling them to connect theory with practice. Containing numerous end-of-chapter problems, e-learning modules, and with stunning field photos and illustrations, this book provides the ultimate learning experience for all students of structural geology.</p>
