Sommario/riassunto

The Results-Based Initiatives (RBI), launched in 2007, were a pioneering attempt to provide comprehensive, coherent, and rigorous evidence on effective interventions to foster the economic empowerment of women. The RBI comprised five small pilots with built-in impact evaluation designed to identify what works best in promoting better outcomes for women as entrepreneurs, wage earners or farmers, under different country contexts. The program was an innovative experiment in an important policy area. While there is a clear rationale for policy interventions to help remove constraints to women's ec
