3. Record Nr.	UNISA996466715303316
Titolo	Black Holes: Theory and Observation [[electronic resource] ] : Proceedings of the 179th W.E. Heraeus Seminar Held at Bad Honnef, Germany, 18–22 August 1997 // edited by Friedrich W Hehl, Claus Kiefer, Ralph J.K. Metzler
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1998
ISBN	3-540-49535-5
Edizione	[1st ed. 1998.]
Descrizione fisica	1 online resource (XV, 519 p.)
Collana	Lecture Notes in Physics, , 0075-8450 ; ; 514
Disciplina	523.8/875
Soggetti	Astrophysics Gravitation Astrophysics and Astroparticles Classical and Quantum Gravitation, Relativity Theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Overview -- Observations, Astrophysics -- Classical General Relativity -- Beyond Classical General Relativity -- Thermodynamics -- Quantum Theory -- Panel Discussion.
Sommario/riassunto	Einstein's gravitational theory predicts the existence of black holes, objects so dense that light cannot escape their gravitational field. Several types of black hole may exist: mini black holes, stellar black holes, and supermassive black holes with millions of solar masses. Experimental evidence for the existence of stellar and supermassive black holes continues to mount, so what was once considered to be science fiction, has now become reality. This book gives a broad comprehensive introduction and, at the same time, an overview of all aspects of black hole physics. It should be comprehensible to all students in physics, astrophysics, and mathematics. A well-illustrated introduction, selected exercises, and a number of pictures and diagrams help to make the content more accessible. The text discusses observations of black holes in galactic centres and binary systems, a theory of accretion disks, the general relativistic description of black holes, as well as the thermodynamics of black holes and Hawking

radiation.

4. Record Nr.	UNINA9910717070703321
Autore	Mok Shannon
Titolo	An evaluation of using linked survey and administrative data to impute nonfilers to the population of tax return filers // Shannon Mok
Pubbl/distr/stampa	Washington, D.C. : , : Congressional Budget Office, , 2017
Descrizione fisica	1 online resource (57 pages, 2 unnumbered pages) : color illustration
Collana	Working paper ; ; 2017-06
Soggetti	Tax administration and procedure - United States Demographic surveys - United States Tax returns - United States - Simulation methods Income tax - United States - Simulation methods
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"September 2017."
Nota di bibliografia	Includes bibliographical references.
