Nota di contenuto

Introduction -- The costs and benefits of running away: late medieval Florentine plague mortality and behavior -- When economic theory meets medieval contracts: calculating the Monte Comune interest rate -- The chances of getting rich in Renaissance Florence: the wool industry occupational wealth hierarchy -- Palaces and workers: neighborhood residential segregation in Renaissance Florence -- The "state" makes a work of art: the impact of the Catasto home owner tax loophole on the Quattrocento Florentine palazzo building boom -- Not getting ahead in life: the lack of life-cycle wealth accumulation in Quattrocento Tuscany -- Just doing business: testing competition in the Renaissance Florentine wool industry -- Time for it all: women in the Renaissance Florentine wool industry -- Why were Renaissance Florentine wool industry companies so small? -- Conclusion.

Sommario/riassunto

Quantitative Studies of the Renaissance Florentine Economy and Society is a collection of nine quantitative studies probing aspects of Renaissance Florentine economy and society. The collection, organized by topic, source material and analysis methods, discusses risk and return, specifically the population's responses to the plague and also the measurement of interest rates. The work analyzes the population's wealth distribution, the impact of taxes and subsidies on art and architecture, the level of neighborhood segregation and the accumulation of wealth. Additionally, this study assesses the competitiveness of Florentine markets and the level of monopoly power, the nature of women's work and the impact of business risk on the organization of industrial production.

3. Record Nr.	UNINA9910158654403321
Autore	Hoover Stephanie
Titolo	Freedom of religion // Stephanie Hoover
Pubbl/distr/stampa	New York : , : Gareth Stevens Publishing, , 2017
ISBN	1-4824-6185-4
