Sommario/riassunto

Though much has been written about twins, very little research has been done into their everyday lives, both postnatal and prenatal. In this fascinating new study Alessandra Piontelli follows the development and behaviour of thirty pairs of twins from their early life in the womb through to their third year of childhood. Drawing on detailed ultrasound observations and work with mothers and families in clinical and natural settings, the text traces the subtle ways in which various types of twins live, behave and interact with their unequally shared and unique pre- and postnatal environments.

3. Record Nr.	UNISALENTO991003726669707536
Autore	Aristoteles
Titolo	Minor works / Aristotle ; with an english translation by W.S. Hett
Pubbl/distr/stampa	Cambridge, Mass. : Harvard University Press ; London : Heinemann, 1955
