| Sommario/riassunto   | This indispensable research companion widens the perspective of moral consideration in international relations from 'ethics and international relations' to 'ethics in international relations', redressing the (mis)perception that ethical concepts, principles, norms and rules are not in part constitutive of the international system and the agents acting within that system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
