Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [239]-240) and indexes.

Nota di contenuto

Book Cover; Title; Contents; List of illustrations; List of contributors; Theoretical and historiographical foundations; Introduction; Coming full (hermeneutic) circle: The controversy about psychological methods; Reinventing validity: Reflections on principles and practices from beyond the quality-quantity divide; Mixing it up; Discursive analysis and the interpretation of statistics; "Structured judgement methods"--the best of both worlds?; Q methodology and qualiquantology: The example of discriminating between emotions; Examples of mixed method research

Valuing the "value of life": A case of constructed preferences? Method and methodology in interpretive studies of cognitive life; Integrating survey and focus group research: A case study of attitudes of English and German language learners; Mixed methods within the discipline; Educational psychology and difficult pupil behaviour: Qualitative, quantitative or mixed methods?; Taking quality seriously: The case for qualitative feminist psychology in the context of quantitative clinical research on postnatal depression; Future directions; Further reading; Author index; Subject index

Sommario/riassunto

Can qualitative and quantitative methods be combined effectively in psychology? What are the practical and theoretical issues involved? Should different criteria be used to judge qualitative and quantitative research? The acceptance of qualitative research methods in psychology has led to a split between qualitative and quantitative methods and has raised questions about how best to assess the validity of research practice. While the two approaches have traditionally been seen as competing paradigms, more recently, researchers have begun to argue that the divide is artificial.<

Autore	Caboni Pierluigi
Titolo	Innovation Meets Tradition in the Sheep and Goat Dairy Industry
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (92 p.)
Soggetti	Biology, life sciences Research and information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The domestic sheep (<i>Ovis aries</i>) and goat (<i>Capra aegagrus hircus</i>) are small ruminant species widely distributed throughout the world. They were among the first animals to be domesticated. Owing to their small stature and versatility, sheep and goats still are one of the most important food source in many arid regions. Traditionally, autochthonous breeds with a strong milk production seasonality were reared in extensive production systems, on a smallholder farming basis. The huge number and variety of their dairy products reflect the different cultures and traditions of vast areas of the world. However, today the traditional ovine and caprine dairy production chain, from farmers to exporters, is facing the challenges of innovation, sustainability, safety, and productivity, while at the same time protecting each product's individual characteristics. This Special Issue is dedicated to the field of ovine and caprine dairy production with ground-breaking perspectives and approaches, from physical-chemistry studies on milk and dairy, to new feeding strategies, herd management, nutritional quality, animal welfare, sustainability, and omics studies.</p>
