| Sommario/riassunto      | As the principal publication of the Global Alliance for Behavioral Health and Social Justice, the American Journal of Orthopsychiatry (AJO) reflects the Alliance's goal of informing policy, practice, and research concerning behavioral health, social justice, and well-being. Consistent with that mission, the journal publishes articles that clarify, challenge, or reshape the prevailing understanding of factors in the prevention and correction of injustice and in the sustainable development of a humane and just society. AJO publishes theoretical, analytic, and empirical articles on topics related to the Alliance's historic values and themes and that contain clear implications for clinical practice, prevention, public health, law, and/or social policy. |
