

1. Record Nr.	UNICAMPANIAVAN0253739
Autore	Bernadou, Michel
Titolo	The Finite Element Method in Thin Shell Theory: Application to Arch Dam Simulations / Michel Bernadou, Jean-Marie Boisserie
Pubbl/distr/stampa	Boston, : Birkhäuser, : Springer, 1982
Descrizione fisica	x, 199 p. : ill. ; 24 cm
Altri autori (Persone)	Boisserie, Jean-Marie
Soggetti	65K10 - Numerical optimization and variational techniques [MSC 2020] 65N30 - Finite elements, Rayleigh-Ritz and Galerkin methods, finite methods for boundary value problems involving PDEs [MSC 2020] 74H25 - Uniqueness of solutions of dynamical problems in solid mechanics [MSC 2020] 65N15 - Error bounds for boundary value problems involving PDEs [MSC 2020] 74S05 - Finite element methods applied to problems in solid mechanics [MSC 2020] 74G30 - Uniqueness of solutions of equilibrium problems in solid mechanics [MSC 2020]
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
