Sommario/riassunto	Military Psychology is the bimonthly journal of Division 19 (Society for Military Psychology) of the American Psychological Association. The journal seeks to publish groundbreaking articles on research and clinical practice addressing the application of psychological principles to the military environment. The journal publishes research articles, reviews, communications, and case studies having military applications in the areas of Clinical and Counseling Psychology, Health, Social and Personality Psychology, Industrial and Organizational Psychology and Human Factors. Timely topics of major concern to military psychology will also be covered in special journal issues.
