Sommario/riassunto	<p>ehaviour &amp; Information Technology (BIT)puts people before technology. As such it deviates from other related journals. It is the primary scientific venue for peer-reviewed publications on human-centred IT. BIT reports original research studies, practical case studies, and thoughtful articles on:</p> <ul style="list-style-type: none"> <li>• usability and user experience (UX)</li> <li>• human computer interaction (HCI)</li> <li>• human-centred and user-centred design</li> <li>• the social, business and human aspects of the digital world.</li> </ul> <p>The Journal attracts authors and readers from a variety of disciplines (e. g., usability, user experience, psychology, ergonomics, computer science, and sociology), originating from both academics and industry.</p>
