Sommario/riassunto	<p>GROUP is a scholarly quarterly that publishes articles and reviews on group psychotherapy and group phenomena in general. Continuously published since 1976, GROUP is the journal of the Eastern Group Psychotherapy Society, an affiliate of the American Group Psychotherapy Association. Although the main focus is clinical and theoretical issues in group practice and supervision, GROUP also publishes research articles with clinical relevance. The journal pursues the goal of encouraging creative thought and dissemination of knowledge about group processes in a world where group methods are used widely, but with multiple theoretical orientations, contexts, purposes and ideologies. Writing in such fields as politics, sociology, history, economics, healthcare, education and the arts is also featured.</p>
