	Soggetti	Architettura
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Sommario/riassunto	This book proposes an overview of the researches initiated in 2015 in the Design PhD programme of Politecnico di Milano. All of them explore the implications of the ongoing digital transformations, from the specific perspective of design research. Throughout the book, the cultural, organisational, social, and managerial issues raised by digital technology, are debated and how such issues call for a reframing of design processes, practices and models.
