

1. Record Nr.	UNICASPUV0735475
Titolo	Beni culturali a Napoli nell'Ottocento : atti del Convegno di studi, Napoli, 5-6 novembre 1997
Pubbl/distr/stampa	Roma, : Ministero per i beni e le attività culturali, Ufficio centrale per i beni archivistici, 2000
ISBN	8871251717
Descrizione fisica	287 p. ; 24 cm.
Collana	Pubblicazioni degli archivi di Stato , . Saggi ; 61
Disciplina	363.69094573 709.45731
Soggetti	Patrimonio culturale - Napoli - sec. 19. - Congressi - 2000 Patrimonio artistico - Napoli - sec. 19. - Congressi - 2000 Patrimonio culturale - Tutela - Napoli - Sec. 19. - Congressi Napoli 1997 Napoli - Vita artistica e culturale - Sec. 19
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910566458803321
Autore	Vecino Xanel
Titolo	Wastewater Treatment by Adsorption and/or Ion-Exchange Processes for Resource Recovery
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (120 p.)
Soggetti	Environmental science, engineering and technology History of engineering and technology Technology: general issues
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The triple-R model (reduce, reuse, and recycle) is the essential concept of the circular economy. Due to population growth, the recovery of added-value products from wastes has become a challenge. Wastewaters of different origin (urban, industrial, mining, textile, distillery, and microbial culture, among others) are rich in energy, water, and nutrient sources that can be recovered and reused within a circular economy framework. Recently, wastewater treatment plants have been converted into biofactories, since they can convert waste into new products (water, nutrients, fertilizers, biomethane, electricity, heat, etc.) with a minimal environmental impact. In this context, adsorption and ion-exchange, as well as the integration of both processes, have been proposed as promising technologies for the treatment of wastewaters for resource recovery. Therefore, the aim of this Special Issue, entitled "Wastewater Treatment by Adsorption and/or Ion-Exchange Processes for Resource Recovery", is to promote these two processes as innovative and environmentally friendly alternatives for the recovery of secondary raw materials from by-products or waste streams. These processes could improve the environmental, economic, and social impacts of the currently used wastewater treatment techniques.</p>
