   Sommario/riassunto   This book constitutes the refereed proceedings of the 6th International
                        Conference on Web Reasoning and Rule Systems, RR 2012, held in
                        Vienna, Austria, in September 2012. The 27 revised research papers,
                        presented together with 2 invited talks and 5 research summaries were
                        carefully reviewed and selected from 42 submissions. The papers were
                        organized in topical sections on technical communications, algorithms,
                        design aspects of rule markup, design of ontology languages,

engineering of engines, translators, and other tools, standardization efforts, such as the Rules Interchange Format activity at W3C, and applications.

| Sommario/riassunto | This book constitutes the refereed proceedings of the Second International Conference on Web Reasoning and Rule Systems, RR 2008, held in Karlsruhe, Germany in October/November 2008. The 12 revised full papers, 4 revised short papers presented together with 5 poster papers were carefully reviewed and selected from over 35 submissions. The papers address all current topics in Web reasoning and rule systems such as acquisition of rules and ontologies by knowledge extraction, design and analysis of reasoning languages, implemented tools and systems, standardization, ontology usability, ontology languages and their relationships, rules and ontologies, reasoning with uncertainty, reasoning with constraints, rule languages and systems, semantic Web services modeling and applications. |
