Sommario/riassunto	The significant real exchange rate appreciation in Armenia and Georgia since 2003, coupled with persistent current account deficits, raises the question of whether real exchange rates have become overvalued. This paper seeks to identify possible exchange rate misalignment by applying the behavioral equilibrium exchange rate approach, complemented by an analysis of the traditional competitiveness indicators. The results indicate an undervaluation of the Armenian dram and no significant misalignment of the Georgian lari in 2006.

Sommario/riassunto	This new edition of an informative and accessible book guides building surveyors and facilities managers through the key aspects of property maintenance and continues to be of value to both students and practitioners. With the increasing cost of new-build, effective maintenance of existing building stock is becoming ever more important and building maintenance work now represents nearly half of total construction output in the UK. Building Maintenance Management provides a comprehensive profile of the many aspects of property maintenance. This second edition has been updated thro
