Sommario/riassunto

Whereas standard approaches to risk and vulnerability presuppose a strict separation between humans and their world, this book develops an existential-phenomenological approach according to which we are always already beings-at-risk. Moreover, it is argued that in our struggle against vulnerability, we create new vulnerabilities and thereby transform ourselves as much as we transform the world. Responding to the discussion about human enhancement and information technologies, the book then shows that this dynamic-relational approach has important implications for the evaluation of new technologies and their risks. It calls for a normative anthropology of vulnerability that does not ask which objective risks are acceptable, how we can become invulnerable, or which technologies threaten human nature, but which vulnerability transformations we want. To the extent that we can steer the growth of new technologies at all, this tragic and sometimes comic project should therefore be guided by what we want to become.

Sommario/riassunto	"Drawing on firsthand interviews and recently declassified documents from archives in North America, Europe, and South America, Harmer provides the most comprehensive account to date of Cuban involvement in Latin America in the early 1970's, Chilean foreign relations during Allende's presidency, Brazil's support for

counterrevolution in the Southern Cone, and the Nixon administration's Latin American policies. Harmer argues that this battle was part of a dynamic inter-American Cold War struggle to determine Latin America's future"--Provided by publisher.

"Fidel Castro described Salvador Allende's democratic election as president of Chile in 1970 as the most important revolutionary triumph in Latin America after the Cuban revolution. Yet celebrations were short lived. In Washington, the Nixon administration vowed to destroy Allende's left-wing government while Chilean opposition forces mobilized against him. The result was a battle for Chile that ended in 1973 with a right-wing military coup and a brutal dictatorship lasting nearly twenty years. Tanya Harmer argues that this battle was part of a dynamic inter-American Cold War struggle to determine Latin America's future, shaped more by the contest between Cuba, Chile, the United States, and Brazil than by a conflict between Moscow and Washington. Drawing on firsthand interviews and recently declassified documents from archives in North America, Europe, and South America--including Chile's Foreign Ministry Archive--Harmer provides the most comprehensive account to date of Cuban involvement in Latin America in the early 1970's, Chilean foreign relations during Allende's presidency, Brazil's support for counterrevolution in the Southern Cone, and the Nixon administration's Latin American policies. The Cold War in the Americas, Harmer reveals, is best understood as a multidimensional struggle, involving peoples and ideas from across the hemisphere"--Provided by publisher.
