Sommario/riassunto	The NRC has convened the Committee on Monitoring International Labor Standards to provide expert, science-based advice on monitoring compliance with international labor standards. The committee held a workshop in July 2002 to assess the quality of information and

measures of progress towards compliance with international labor standards. This document summarizes the workshop. Reflecting the workshop agenda, this report focuses primarily on the availability and quality of information to measure compliance with four core international labor standards that were identified in 1998 by the ILO. The goal of this workshop summary is to communicate the key ideas and themes that emerged from the workshop presentations and discussions.
