

1.	Record Nr.	UNICASUFI0046904
	Autore	Khanna, Tarun
	Titolo	Foundations of neural networks / Tarun Khanna
	Pubbl/distr/stampa	Reading [etc.], : Addison-Wesley, c1990
	ISBN	0201500361
	Descrizione fisica	XII, 196 p. ; 24 cm.
	Disciplina	006.3
	Soggetti	Reti neurali
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9911019390203321
	Autore	Pedrycz Witold <1953->
	Titolo	Fuzzy systems engineering : toward human-centric computing / / Witold Pedrycz, Fernando Gomide
	Pubbl/distr/stampa	Hoboken, N.J., : John Wiley, : IEEE, c2007
	ISBN	9786611001926 9781281001924 1281001929 9780470168967 047016896X 9780470168950 0470168951
	Descrizione fisica	1 online resource (550 p.)
	Altri autori (Persone)	GomideFernando
	Disciplina	006.3
	Soggetti	Soft computing Fuzzy systems
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	<p>Preface -- 1 Introduction -- 1.1 Digital communities and a fundamental quest for human-centric systems -- 1.2 A historical overview: towards a non-Aristotelian perspective of the world -- 1.3 Granular Computing -- 1.4 Quantifying information granularity: generality versus specificity -- 1.5 Computational Intelligence -- 1.6 Granular Computing and Computational Intelligence -- 1.7 Conclusions -- Exercises and problems -- Historical notes -- References -- 2 Notions and Concepts of Fuzzy Sets -- 2.1 Sets and fuzzy sets: a departure from the principle of dichotomy -- 2.2 Interpretation of fuzzy sets -- 2.3 Membership functions and their motivation -- 2.4 Fuzzy numbers and intervals -- 2.5 Linguistic variables -- 2.6 Conclusions -- Exercises and problems -- Historical notes -- References -- 3 Characterization of Fuzzy Sets -- 3.1 A generic characterization of fuzzy sets: some fundamental descriptors -- 3.2 Equality and inclusion relationships in fuzzy sets -- 3.3 Energy and entropy measures of fuzziness -- 3.4 Specificity of fuzzy sets -- 3.5 Geometric interpretation of sets and fuzzy sets -- 3.6 Granulation of information -- 3.7 Characterization of the families of fuzzy sets -- 3.8 Fuzzy sets, sets, and the representation theorem -- 3.9 Conclusions -- Exercises and problems -- Historical notes -- References -- 4 The Design of Fuzzy Sets -- 4.1 Semantics of fuzzy sets: some general observations -- 4.2 Fuzzy set as a descriptor of feasible solutions -- 4.3 Fuzzy set as a descriptor of the notion of typicality -- 4.4 Membership functions in the visualization of preferences of solutions -- 4.5 Nonlinear transformation of fuzzy sets -- 4.6 Vertical and horizontal schemes of membership estimation -- 4.7 Saaty's priority method of pairwise membership function estimation -- 4.8 Fuzzy sets as granular representatives of numeric data -- 4.9 From numeric data to fuzzy sets -- 4.10 Fuzzy equalization -- 4.11 Linguistic approximation.</p> <p>4.12 Design guidelines for the construction of fuzzy sets -- 4.13 Conclusions -- Exercises and problems -- Historical notes -- References -- 5 Operations and Aggregations of Fuzzy Sets -- 5.1 Standard operations on sets and fuzzy sets -- 5.2 Generic requirements for operations on fuzzy sets -- 5.3 Triangular norms -- 5.4 Triangular conorms -- 5.5 Triangular norms as a general category of logical operators -- 5.6 Aggregation operations -- 5.7 Fuzzy measure and integral -- 5.8 Negations -- 5.9 Conclusions -- Exercises and problems -- Historical notes -- References -- 6 Fuzzy Relations -- 6.1 The concept of relations -- 6.2 Fuzzy relations -- 6.3 Properties of the fuzzy relations -- 6.4 Operations on fuzzy relations -- 6.5 Cartesian product, projections and cylindrical extension of fuzzy sets -- 6.6 Reconstruction of fuzzy relations -- 6.7 Binary fuzzy relations -- 6.8 Conclusions -- Exercises and problems -- Historical notes -- References -- 7 Transformations of Fuzzy Sets -- 7.1 The extension principle -- 7.2 Compositions of fuzzy relations -- 7.3 Fuzzy relational equations -- 7.4 Associative Memories -- 7.5 Fuzzy numbers and fuzzy arithmetic -- 7.6 Conclusions -- Exercises and problems -- Historical notes -- References -- 8 Generalizations and Extensions of Fuzzy Sets -- 8.1 Fuzzy sets of higher order -- 8.2 Rough fuzzy sets and fuzzy rough sets -- 8.3 Interval-valued fuzzy sets -- 8.4 Type-2 fuzzy sets -- 8.5 Shadowed sets as a three-valued logic characterization of fuzzy sets -- 8.6 Probability and fuzzy sets -- 8.7 Probability of fuzzy events -- 8.8 Conclusions -- Exercises and problems -- Historical notes -- References -- 9 Interoperability Aspects of Fuzzy Sets -- 9.1 Fuzzy set and its family of s-cuts -- 9.2</p>

Fuzzy sets and their interfacing with the external world -- 9.3  
Encoding and decoding as an optimization problem of vector  
quantization -- 9.4 Decoding of a fuzzy set through a family of fuzzy  
sets.  
9.5 Taxonomy of data in structure description with shadowed sets --  
9.6 Conclusions -- Exercises and problems -- Historical notes --  
References -- 10. Fuzzy Modeling: Principles and Methodology -- 10.1  
The architectural blueprint of fuzzy models -- 10.2 Key phases of the  
development and use of fuzzy models -- 10.3 Main categories of fuzzy  
models: an overview -- 10.4 Verification and validation of fuzzy  
models -- 10.5 Conclusions -- Exercises and problems -- Historical  
notes -- References -- 11 Rule-based Fuzzy Models -- 11.1 Fuzzy  
rules as a vehicle of knowledge representation -- 11.2 General  
categories of fuzzy rules and their semantics -- 11.3 Syntax of fuzzy  
rules -- 11.4 Basic Functional Modules: Rule base, Database, and  
Inference scheme -- 11.5 Types of Rule-Based Systems and  
Architectures -- 11.6 Approximation properties of fuzzy rule-based  
models -- 11.7 Development of Rule-Based Systems -- 11.8 Parameter  
estimation procedure for functional rule-based systems -- 11.9 Design  
issues of rule-based systems - consistency, completeness, and the  
curse of dimensionality -- 11.10 The curse of dimensionality in rule-  
based systems -- 11.11 Development scheme of fuzzy rule-based  
models -- 11.12 Conclusions -- Exercises and problems -- Historical  
notes -- References -- 12 From Logic Expressions to Fuzzy Logic  
Networks -- 12.1 Introduction -- 12.2 Main categories of fuzzy  
neurons -- 12.3 Uniform-based fuzzy neurons -- 12.4 Architectures  
of logic networks -- 12.5 The development mechanisms of the fuzzy  
neural networks -- 12.6 Interpretation of the fuzzy neural networks --  
12.7 From fuzzy logic networks to Boolean functions and their  
minimization through learning -- 12.8 Interfacing the fuzzy neural  
network -- 12.9 Interpretation aspects - a refinement of induced rule-  
based system -- 12.10 Reconciliation of perception of information  
granules and granular mappings -- 12.11 Conclusions -- Exercises  
and problems -- Historical notes.  
References -- 13. Fuzzy Systems and Computational Intelligence --  
13.1 Computational Intelligence -- 13.2 Recurrent neurofuzzy systems  
-- 13.3 Genetic fuzzy systems -- 13.4 Coevolutionary hierarchical  
genetic fuzzy system -- 13.5 Hierarchical collaborative relations --  
13.6 Evolving fuzzy systems -- 13.7 Conclusions -- Exercises and  
problems -- Historical notes -- References -- 14. Granular Models and  
Human Centric Computing -- 14.1 The cluster-based representation of  
the input - output mappings -- 14.2 Context-based clustering in the  
development of granular models -- 14.3 Granular neuron as a generic  
processing element in granular networks -- 14.4 Architecture of  
granular models based on conditional fuzzy clustering -- 14.5  
Refinements of granular models -- 14.6 Incremental granular models  
-- 14.7 Human-centric fuzzy clustering -- 14.8 Participatory learning  
in fuzzy clustering -- 14.9 Conclusions -- Exercises and problems --  
Historical notes -- References -- 15. Emerging Trends in Fuzzy  
Systems -- 15.1 Relational ontology in information retrieval -- 15.2  
Multiagent fuzzy systems -- 15.3 Distributed fuzzy control -- 15.4  
Conclusions -- Exercises and problems -- Historical notes --  
References -- Appendix A: Mathematical Prerequisites -- Appendix B:  
Neurocomputing -- Appendix C: Biologically Inspired Optimization --  
Index.

passed since the birth of fuzzy sets, in which time a wealth of theoretical developments, conceptual pursuits, algorithmic environments, and other applications have emerged. Now, this reader-friendly book presents an up-to-date approach to fuzzy systems engineering, covering concepts, design methodologies, and algorithms coupled with interpretation, analysis, and underlying engineering knowledge. The result is a holistic view of fuzzy sets as a fundamental component of computational intelligence and human-centric systems. Throughout the book, the authors emphasize the direct applicability and limitations of the concepts being discussed, and historical and bibliographical notes are included in each chapter to help readers view the developments of fuzzy sets from a broader perspective. A radical departure from current books on the subject, *Fuzzy Systems Engineering* presents fuzzy sets as an enabling technology whose impact, contributions, and methodology stretch far beyond any specific discipline, making it applicable to researchers and practitioners in engineering, computer science, business, medicine, bioinformatics, and computational biology. Additionally, three appendices and classroom-ready electronic resources make it an ideal textbook for advanced undergraduate- and graduate-level courses in engineering and science.
