Nota di bibliografia	Includes bibliographical references (p. [273]-299) and index.
Nota di contenuto	Intuitionist theory and interpersonal comparisons -- Disability and welfare -- Utilitarianism and distribution to the disabled -- Egalitarianism and distribution to the disabled -- Rawls -- Dworkin -- Ackerman -- Welfarism weighted or unweighted? -- Intuition about aggregation -- Distribution of life.
Sommario/riassunto	<p>Theories of distributive justice are most severely tested in the area of disability. In this book, Mark Stein argues that utilitarianism performs better than egalitarian theories in this area: whereas egalitarian theories help the disabled either too little or too much, utilitarianism achieves the proper balance by placing resources where they will do the most good. Stein offers what may be the broadest critique of egalitarian theory from a utilitarian perspective. He addresses the work of egalitarian theorists John Rawls, Ronald Dworkin, Amartya Sen, Bruce Ackerman, Martha Nussbaum, Norman Daniels, Philippe Van Parijs, and others. Stein claims that egalitarians are often driven to borrow elements of utilitarianism in order to make their theories at all plausible. The book concludes with an acknowledgment that both utilitarians and egalitarians face problems in the distribution of life-saving medical resources. Stein advocates a version of utilitarianism that would distribute life-saving resources based on life expectancy, not quality of life. Egalitarian theories, he argues, ignore life expectancy and so are again found wanting. Distributive Justice and Disability is a powerful and engaging book that helps to reframe the debate between egalitarian and utilitarian thinkers.</p>

Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Advanced Analytics and Deep Learning Models The book provides readers with an in-depth understanding of concepts and technologies related to the importance of analytics and deep learning in many useful real-world applications such as e-healthcare, transportation, agriculture, stock market, etc. Advanced analytics is a mixture of machine learning, artificial intelligence, graphs, text mining, data mining, semantic analysis. It is an approach to data analysis. Beyond the traditional business intelligence, it is a semi and autonomous analysis of data by using different techniques and tools. However, deep learning and data analysis both are high centers of data science. Almost all the private and public organizations collect heavy amounts of data, i.e., domain-specific data. Many small/large companies are exploring large amounts of data for existing and future technology. Deep learning is also exploring large amounts of unsupervised data making it beneficial and effective for big data. Deep learning can be used to deal with all kinds of problems and challenges that include collecting unlabeled and uncategorized raw data, extracting complex patterns from a large amount of data, retrieving fast information,

tagging data, etc. This book contains 16 chapters on artificial intelligence, machine learning, deep learning, and their uses in many useful sectors like stock market prediction, a recommendation system for better service selection, e-healthcare, telemedicine, transportation. There are also chapters on innovations and future opportunities with fog computing/cloud computing and artificial intelligence. Audience Researchers in artificial intelligence, big data, computer science, and electronic engineering, as well as industry engineers in healthcare, telemedicine, transportation, and the financial sector. The book will also be a great source for software engineers and advanced students who are beginners in the field of advanced analytics in deep learning.

Sommario/riassunto

In this study titled The Core Human Rights Treaties and Thailand , Vitit Muntarbhorn examines the relationship between Thailand and the nine key human rights Conventions, known as the Core Human Rights Treaties, in addition to their Protocols. These agreements cover a range of civil, political, economic, social and cultural issues, in addition to the rights of specific groups. The study offers a mirror for reflection, testing the linkage between international standards and national implementation in a dynamic and challenging context.
