Frutes : paremias and Elizabethan teaching of the Italian language --
Pompeo Sarnelli's Posilecheata : paremias and the multi-faceted
Neapolitan Baroque -- Conclusion -- Index of paremias in *Le cento
novelle*, *Firste fruities*, *seond frutes*, and *Posilecheata*.

Sommario/riassunto

"Proverbs constitute a rich archive of historical, cultural, and linguistic significance that affect genres and linguistics codes. They circulate through writers, texts, and communities in a process that ultimately results in modifications in their structure and meanings. Hence, context plays a crucial role in defining proverbs as well as in determining their interpretation. Vincenzo Brusantino's *Le cento novelle* (1554), John Florio's *Firste Fruites* (1578) and *Second Frutes* (1591), and Pompeo Sarnelli's *Posilecheata* (1684) offer clear representations of how traditional wisdom and communal knowledge reflect the authors' personal perspectives on society, culture, and literature. The analysis of the three authors' proverbs through comparisons with classical, medieval, and early modern collections of maxims and sententiae provides insights on the fluidity of such expressions, and illustrates the tight relationship between proverbs and sociocultural factors.

Brusantino's proverbs introduce ethical interpretations to the one hundred novellas of Boccaccio's *The Decameron*, which he rewrites in octaves of hendecasyllables. His text appeals to Counter-Reformation society and its demand for a comprehensible and immediately applicable morality. In Florio's two bilingual manuals, proverbs fulfill a need for language education in Elizabethan England through authentic and communicative instruction. Florio manipulates the proverbs' vocabulary and syntax to fit the context of his dialogues, best demonstrating the value of learning Italian in a foreign country.

Sarnelli's proverbs exemplify the inherent creative and expressive potentialities of the Neapolitan dialect vis-a-vis languages with a more robust literary tradition. As moral maxims, ironic assessments, or witty insertions, these proverbs characterize the Neapolitan community in which the fables take place"--

Sommario/riassunto

Mountain forests provide important ecological services, and essential products. This book focuses on the importance of mountain forests in Cameroon for the local people who depend most directly on them, and have often developed a wealth of indigenous knowledge on plants and sophisticated institutions for managing limited plant and animal resources. Such knowledge and institutions have often been threatened, or even destroyed, by centralization and globalization; yet there is increasing recognition that community-based institutions are the best adapted to ensuring that mountain forests continue
