

1.	Record Nr.	UNINA990000333170403321
	Autore	Jüptner von Jonstorff, Hanns
	Titolo	Beziehungen zwischen der chemischen Zusammensetzung und den physikalischen Eigenschaften von Eisen und Stahl / Von Hanns Freiherr Jüptner von Jonstorff
	Pubbl/distr/stampa	Leipzig : Verlag von Felix, 1896
	Descrizione fisica	VI, 68 p., 24 cm
	Disciplina	672
	Locazione	DINCH
	Collocazione	04 182-73
	Lingua di pubblicazione	Tedesco
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910473447903321
	Autore	Ewert Amelie
	Titolo	Small Electric Vehicles : An International View on Light Three- and Four-Wheelers
	Pubbl/distr/stampa	Springer Nature, 2021 Cham : , : Springer International Publishing AG, , 2021 ©2021
	ISBN	3-030-65843-0
	Descrizione fisica	1 online resource (193 pages)
	Classificazione	TEC009020TEC009090TEC031000
	Altri autori (Persone)	Schmid Stephan Brost Mascha Davies Huw (Huw Charles) Vinckx Luc
	Disciplina	629.2293
	Soggetti	Power generation & distribution Automotive technology & trades Highway & traffic engineering
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa

Intro -- Preface -- Contents -- List of Figures -- List of Tables --
Introducing SEVs -- 1 Small Electric Vehicles-Benefits and Drawbacks
for Sustainable Urban Development -- Abstract -- 1 Introduction -- 2
Mixed-Method-Approach -- 3 Definition of Small Electric Vehicles -- 4
Benefits and Obstacles Derived from SEVs -- 4.1 Potential for
Environmental Benefits -- 4.2 Potentials for Land Use -- 4.3 Safety as a
Large Drawback -- 4.4 Costs of SEVs -- 5 Vision of SEVs -- References
-- 2 Courses of Action for Improving the Safety of the Powered Cycle
-- Abstract -- 1 How to Increase Bicycle Use and at the Same Time
Reduce Casualties and Injuries Resulting from Bicycle Accidents -- 2 EU
Classification of Vehicles -- 3 Use of the Bicycle Lane: Differences
Between Countries -- 4 Calculation of the Maximum Mass of a Powered
Cycle -- 5 Conclusion -- References -- 3 Velomobiles and Urban
Mobility: Opportunities and Challenges -- Abstract -- 1 Introduction --
2 Velomobile Characteristics -- 3 Opportunities and Challenges -- 4
Conclusion -- References -- 4 The UK Approach to Greater Market
Acceptance of Powered Light Vehicles (PLVs) -- Abstract -- 1
Introduction -- 2 Background -- 3 Path to System Transformation --
3.1 Case 1: Micromobility and the UK -- 3.2 Case 2: Powered Light
Vehicles for Freight and the UK -- 4 Discussion -- 5 Next Steps --
References -- Case Studies and Applications of SEVs -- 5 The ELVITEN
Project as Promoter of LEVs in Urban Mobility: Focus on the Italian Case
of Genoa -- Abstract -- 1 The ELVITEN Project -- 2 The Current Trend
in the LEV Sector -- 3 The Case Study of Genoa -- 3.1 The ELVITEN
Project in Genoa -- 3.2 Focus on Genoa Data -- 4 Conclusions:
Challenges of LEVs -- Acknowledgements -- References.
6 Small Electric Vehicles in Commercial Transportation: Empirical Study
on Acceptance, Adoption Criteria and Economic and Ecological Impact
on a Company Level -- Abstract -- 1 Introduction -- 2 Materials and
Methods -- 3 Results -- 3.1 Results of the Online Survey: Diffusion of,
Motives for and Barriers to the Use of SEVs -- 3.2 Supplementary
Findings from Interviews with Companies from Potentially SEV-Relevant
Sectors -- 3.3 Results from the In-Depth Interviews and Quantitative
Analyses: Acceptance and Impact of SEVs for Micro-Hubs in the CEP
Industry -- 4 Summary and Conclusions -- Acknowledgements --
References -- 7 An Energy Efficiency Comparison of Electric Vehicles
for Rural-Urban Logistics -- Abstract -- 1 Introduction -- 1.1
Developments in Rural BEV Application -- 1.2 Facility Test Environment
in Heilbronn-Franconia Region -- 2 Digital Prototypes and Simulated
Driving Cycles -- 2.1 Creating a Digital Mock-up -- 2.2 CFD Based
Roof Extension Development -- 2.3 Driving Cycles for the Rural-Urban
Use Case -- 2.4 Simulation Model for Vehicle Drive Cycles -- 3 Result
Evaluation for Designs and Energy Consumption -- 3.1 Enlargement of
the Interior Space -- 3.2 CFD Simulation Results -- 3.3 Results of the
Simulated Drive Cycles -- 4 Conclusion -- References -- 8
Electrification of Urban Three-Wheeler Taxis in Tanzania: Combining
the User's Perspective and Technical Feasibility Challenges -- Abstract
-- 1 Introduction -- 2 Methods and Data Collection -- 2.1 Data
Collection -- 2.2 Modelling of Vehicle and Power Train -- 2.3
Modelling of Battery Storage and Charging Point Interdependency -- 3
Results -- 3.1 Economic Feasibility and Drivers' Acceptance of E-
Mobility -- 3.2 Drive Cycle -- 3.3 Energy Demand -- 3.4 Battery and
Opportunity Charging Point Demand -- 4 Conclusions -- References --
Impact Studies and Effects of SEV Deployment.

9 Small Electric Vehicles (SEV)-Impacts of an Increasing SEV Fleet on the Electric Load and Grid -- Abstract -- 1 Introduction -- 2 Status Quo SEV and Grip Impact -- 3 Method -- 4 Case Study Stuttgart -- 5 Conclusion -- References -- 10 Fields of Applications and Transport-Related Potentials of Small Electric Vehicles in Germany -- Abstract -- 1 Introduction -- 2 Materials and Methods -- 2.1 Qualitative Expert Interviews -- 2.2 Quantitative Data Analyses with the NHTS Mobility in Germany -- 3 Results -- 3.1 Feasible Transport Impacts and User Potentials of SEVs in Passenger Transport -- 3.2 Feasible Transport Impacts and User Potentials of SEVs in Commercial Transport -- 3.3 Feasible Applications and Business Models of SEVs -- 4 Conclusions and Outlook -- References -- Vehicle Concepts and Technologies -- 11 KYBURZ Small Electric Vehicles: A Case Study in Successful Deployment -- Abstract -- 1 Introduction -- 2 Methods -- 3 Environmental Impact and Geography -- 4 Urban Space Implications -- 5 Commercial Efficiency -- 6 Circular Economies -- 7 Summary and Conclusions -- References -- 12 BICAR-Urban Light Electric Vehicle -- Abstract -- 1 Introduction -- 2 Main Features -- 3 Cradle to Cradle Production -- 4 User-Centred Layout Conception -- 5 Frame and Structure -- 6 Chassis -- 7 Energy Management -- 8 Conclusion -- References -- 13 Conception and Development of a Last Mile Vehicle for Urban Areas -- Abstract -- 1 Introduction -- 2 Methodical Approach -- 3 Field Study, Use Cases, and Vehicle Requirements -- 4 Draft Designs, Evaluation, and Conceptual Component Design -- 5 Prototyping -- 5.1 Vehicle Design and Characteristics -- 5.2 Key Characteristic-Vehicle Integration -- 6 Summary and Outlook -- Acknowledgements -- References -- 14 Development of the Safe Light Regional Vehicle (SLRV): A Lightweight Vehicle Concept with a Fuel Cell Drivetrain. Abstract -- 1 Safe Light Regional Vehicle Concept (SLRV) -- 2 Concept of the Car Body -- 3 Testing of the Car Body -- 3.1 Experimental Set-Up and Implementation -- 3.2 Crash-Test Facility at the DLR Institute of Vehicle Concepts -- 3.3 Pole Crash Test Implementation -- 3.4 Experimental Set-Up for Frontal Crash Test -- 4 Results of the Front Crash Test -- 4.1 Behaviour of the Passenger Compartment in the Frontal Crash Test -- 4.2 Drivetrain of the SLRV -- 4.3 Installation of the Operable Research Vehicle -- References.

Sommario/riassunto

This edited open access book gives a comprehensive overview of small and lightweight electric three- and four-wheel vehicles with an international scope. The present status of small electric vehicle (SEV) technologies, the market situation and main hindering factors for market success as well as options to attain a higher market share including new mobility concepts are highlighted. An increased usage of SEVs can have different impacts which are highlighted in the book in regard to sustainable transport, congestion, electric grid and transport-related potentials. To underline the effects these vehicles can have in urban areas or rural areas, several case studies are presented covering outcomes of pilot projects and studies in Europe. A study of the operation and usage in the Global South extends the scope to a global scale. Furthermore, several concept studies and vehicle concepts on the market give a more detailed overview and show the deployment in different applications.
