

1.	Record Nr.	UNINA990000361480403321
	Autore	Berge, August
	Titolo	Die Fabrikationen von Bittersalz und Chlormagnesium als Nebenbetriebe der Chlorkalium- und Kaliumsulfat-Fabrikation / (von) August Berge
	Pubbl/distr/stampa	Halle a.S. : Verlag von Wilhelm Knapp, 1912
	Descrizione fisica	VI,61 p. ill. 23 cm
	Collana	Monographien über chemisch-technische Fabrikationsmethoden ; band XXVIII
	Locazione	DINCH
	Collocazione	04 100-65
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910808231903321
	Titolo	Greater Tibet : an examination of borders, ethnic boundaries, and cultural areas / / edited by P. Christiaan Klieger
	Pubbl/distr/stampa	Lanham, Maryland : , : Lexington Books, , 2016 ©2016
	ISBN	1-4985-0645-3
	Descrizione fisica	1 online resource (182 p.)
	Disciplina	951/.5
	Soggetti	Tibetan diaspora Tibetans - Ethnic identity Tibet Region Civilization Congresses Tibet Region History Congresses
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.

Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Notes on Transliterations; Introduction: Greater Tibet; 1 Tibetan Exile or Diaspora; 2 Another Tibet at the Heart of Qing China; 3 The Rawang Tribes of Highland Southeast Asia; 4 Tibet as a State; 5 The Role of India's National Interests vis-a-vis Tibet; 6 The Baltistan Movement on Facebook; 7 A Case for Gelukpa Governance; 8 Essay: Buddhism Post-Soviet Union; 9 Essay: A Greater Tibet and the Irony of Liberation; Bibliography; Index; About the Contributors
Sommario/riassunto	The papers in this volume examine the variations of cultural expression within "Greater Tibet," a conceptual framework that considers Tibeto-Burman speakers and their mutual affiliations as a group different from the larger nation-states in which they now find themselves.

3. Record Nr.	UNINA9910130584603321
Autore	Eyert Volker
Titolo	The augmented spherical wave method : a comprehensive treatment / / Volker Eyert
Pubbl/distr/stampa	Berlin ; ; New York, : Springer, c2012
ISBN	3-642-25864-6
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (XV, 379 p.)
Collana	Lecture notes in physics, , 0075-8450 ; ; v.849
Disciplina	515/.53
Soggetti	Spherical harmonics Electronic structure Density functionals Differential equations, Partial
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- The Standard ASW Method -- Envelope Functions and Structure Constants -- The Plane-Wave Based Full-Potential ASW Method -- The Spherical-Wave Based Full-Potential ASW Method -- Details of the Standard ASW Method -- Details of the Envelope Functions -- Details of the Full-Potential ASW Methods -- Brillouin-Zone Integration -- Further Reading -- Index.

The Augmented Spherical Wave (ASW) method is one of the most powerful approaches to handle the requirements of finite basis sets in DFT calculations. It is particularly suited for the calculation of the electronic, magnetic, and optical properties of solid-state materials. Recent developments allow application, in addition, to the elastic properties and phonon spectra. Due to the localized nature of the ASW basis set these properties can be easily interpreted in terms of atomic-like orbitals. The book addresses all those who want to learn about methods for electronic structure calculations and the ASW method in particular. This new edition has been thoroughly revised and extended. In particular, a chapter on the new, both very efficient and accurate spherical-wave based full potential ASW method has been added.
