Disciplina	333.79/4
Soggetti	Renewable energy sources Power resources Sustainable development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	CONTENTS; Chapter 1 - Renewable Energy Sources; Chapter 2 - Biomass Energy; Chapter 3 - Solar, Wind, Wave and Geothermal Energy; Chapter 4 - Greenhouse Gas Emissions; Chapter 5 - Gas Production and Utilization; Chapter 6 - Sustainability Development; Foreword
Sommario/riassunto	New and renewable energy systems will play an important role in the sustainable development of a future energy strategy. Recent development in this field has proved that the virtual energy system including new and renewable energy sources is feasible. The promotion of renewable sources of energy is a high priority, for security and diversification of energy supply, environmental protection, and social and economic cohesion. This volume discusses the latest research on

new and renewable energy resources and their utilization, emphasizing  
the present state of the art in the field and potential f
