Sommario/riassunto	Denmark of the twelfth to thirteenth centuries was a place of transitions, and this volume analyzes that period through the lens of the 'Gesta Danorum' of Saxo Grammaticus and other sources. The 'Gesta' defends not only hierocratic conceptions but the Danish hegemonic project in the Baltic - which was grounded in the crusade

movements. Such movements are presented through complex language and imagery about a glorious past brought to bear on the projects in the thirteenth century while internal tensions strengthen the monarchic and ecclesiastical institutions.
