## Sommario/riassunto

One of the cornerstones of the Universal Health Coverage (UHC) initiative is access to essential medicines and health technologies. Medical devices assistive devices and eHealth solutions are important components of health technology which have the potential to save lives and improve quality of life and well-being. However too many people worldwide suffer because they don't have access to high quality affordable health technology with the problem being more acute in low- and middle-income countries. The objective of the compendium series of innovative medical devices assistive devices and eHealth
