The local view on the role of plant protection in sustainable agriculture in IndiaGeneral discussion I I; Communication and implementation of change in crop protection; Plant diseases in India and their control; Sustainable agriculture and integrated pest management in China; Towards the rational management of the insect pests of tropical legume crops in Asia: review and remedy; Perspectives for crop protection in sustainable agriculture; Summary; Index of contributors; Subject index

Sommario/riassunto

The increase in the world population and changes in welfare have led to an enormously expanding demand for food. In the industrialized world, food surpluses rather than shortages are a problem together with adverse environmental impacts from the overuse of chemicals and excessive exploitation of agricultural land. In the developing world, food production cannot keep up with population growth and the gap between demand and supply is growing. This book explores the theme of sustainable agricultural development in the developing world, with a particular focus on crop protection. Includes chapters

4. Record Nr.	UNINA9911009198303321
Autore	IAEA
Titolo	Addressing Challenges in Managing Radioactive Waste from Past Activities
Pubbl/distr/stampa	Vienna : , : International Atomic Energy Agency, , 2024 ©2024
