

1. Record Nr.	UNINA990000863740403321
Autore	Holzner, Steven
Titolo	Visual C++ programming / S. Holzner
Pubbl/distr/stampa	Indianapolis : Brady, 1994
ISBN	1-56686-142-X
Edizione	[2. ed]
Descrizione fisica	XVI, 555 p. ; 23 cm
Disciplina	005.1
Locazione	FINBN
Collocazione	02 51 C 69
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910300363403321
Autore	Frampton Mike
Titolo	Complete Guide to Open Source Big Data Stack // by Michael Frampton
Pubbl/distr/stampa	Berkeley, CA : , : Apress : , : Imprint : Apress, , 2018
ISBN	9781484221495 1484221494
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XX, 365 p. 167 illus., 131 illus. in color.)
Disciplina	005.73
Soggetti	Big data Database management Artificial intelligence—Data processing Big Data Database Management Data Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Note generali	Includes index.
Nota di contenuto	Chapter 1: The Big Data Stack Overview -- Chapter 2: Cloud Storage -- Chapter 3: Apache Brooklyn -- Chapter 4: Apache Mesos -- Chapter 5: Stack Storage Options -- Chapter 6: Processing -- Chapter 7: Streaming -- Chapter 8: Frameworks -- Chapter 9: Visualization -- Chapter 10: The Big Data Stack -- .
Sommario/riassunto	See a Mesos-based big data stack created and the components used. You will use currently available Apache full and incubating systems. The components are introduced by example and you learn how they work together. In the Complete Guide to Open Source Big Data Stack, the author begins by creating a private cloud and then installs and examines Apache Brooklyn. After that, he uses each chapter to introduce one piece of the big data stack—sharing how to source the software and how to install it. You learn by simple example, step by step and chapter by chapter, as a real big data stack is created. The book concentrates on Apache-based systems and shares detailed examples of cloud storage, release management, resource management, processing, queuing, frameworks, data visualization, and more. What You'll Learn: Install a private cloud onto the local cluster using Apache cloud stack Source, install, and configure Apache: Brooklyn, Mesos, Kafka, and Zeppelin See how Brooklyn can be used to install Mule ESB on a cluster and Cassandra in the cloud Install and use DCOS for big data processing Use Apache Spark for big data stack data processing.
