Nota di contenuto	Chapter 1: Creating the human capital for the Fourth Industrial Revolution epoch and beyond: perspectives for the manufacturing companies -- Chapter 2: Enhancing learning engagement through creative design: a case on Chemical engineering training -- Chapter 3: Assessment of the Impact of the Deployment of Manual Accreditation Application Systems by Sector Education and Training Authorities Government Agency on Skills Development Providers.
Sommario/riassunto	This proceedings volume contains selected papers from the 33rd International Association for Management of Technology (IAMOT) Conference, held from July 8-11, 2024, in Porto, Portugal. It is the second volume of a three-volume set of conference proceedings focused on technologies for a sustainable future. The book explores

the challenges and opportunities in today's social and business landscapes, delving into innovative and disruptive concepts. With a special emphasis on the role of technologies, it sheds light on how they enable novel approaches to address current issues. The volume demonstrates that, following the principles of Industry 5.0, technologies can go far beyond productivity and economic gains, contributing to the benefit and comfort of human workers. It also elucidates the necessity of adopting a human-centered approach in utilizing technology to adapt production processes to workers' needs, while ensuring that the implementation of new technologies does not infringe upon the fundamental rights of workers.
