| Sommario/riassunto      | On 14 and 15 December 2000 the Milan Centre for Educational Innovation and Experimentation (CISEM), a research institute reporting to the Province of Milan and the Union of Italian Provinces, held an international seminar sponsored by the province and entitled "Intelligent School - Towards the Scholastic Architecture of the Future". The "intelligent school" approach developed in PEB's work, particularly during the 1990s, ties in very closely with the vision emerging from the |

many other viewpoints expressed at the Milan seminar, particularly that of the CISEM.
