Nota di contenuto	Ecohydrological indicators in water resources management -- Monitoring technologies -- Measurement techniques -- Characterization/measuring strategies in different hydrological systems -- Ecohydrological assessment tools.
Sommario/riassunto	This volume will discuss the state of the art of different observation and measurement techniques useful for ecohydrological studies. The techniques cover the entire spectrum of the water-soil-plant-atmosphere continuum. And the other volumes are "Water and Ecosystems", "Water-Limited Environments" and "Integrated Ecohydrological Modeling" etc.
