3. Record Nr.	UNINA9910254135103321
Titolo	Climate Change and Human Health Scenario in South and Southeast Asia // edited by Rais Akhtar
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	3-319-23684-9
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (308 p.)
Collana	Advances in Asian Human-Environmental Research, , 1879-7180
Disciplina	304.25
Soggetti	Environmental geography Climate change Environmental health Environmental Geography Climate Change/Climate Change Impacts Environmental Health
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Introduction -- Climate Change and Health in South Asia -- Climate Change and Health of Elderly Population in Southeast.-Extreme Temperature Regions in India.-Rapid Deglaciation on the Southeast Facing Slopes of Kanchenjunga and Impact on Human Health in Sikkim -- Scenario of malaria and dengue in India: way forward -- Geoecology of Dengue in Delhi -- Managing Dams to Prevent Floods Using MS/OR Techniques: Case Study of Floods and Health Scenario in Surat, Gujarat in 2006 -- Climate Change and Mental Health Pattern in India -- Coastal Cities at Risk: Health and Climate Change Adaptation Resilience Simulator Development -- Climate Change and Health Impacts in Bangladesh -- Climate Change Impacts and Health Adaptation Scenario in Indonesia -- Climate Variability and Human Health in Southeast Asia: A Taiwan Study -- Climate Change and Human Health in Malaysia -- Potential Effects of Climate Changes on Dengue Transmission: A Review of Empirical Evidences from Taiwan -- Summary and Concluding Remarks.

This book is the first to present a regional analysis of climate change and human health, focusing on geographically and socio-economically distinct countries of South and Southeast Asia. It has a major focus on India, Indonesia, Bangladesh, Malaysia, Thailand, Nepal and Taiwan. Climate change is a significant and emerging threat to human health. It represents a range of environmental hazards and will affect populations in both the developed and developing countries. In particular, it affects the regions where the current burden of climate-sensitive diseases are high, which is the case in South and Southeast Asian countries. .
